AVAILABILITY NOTICE

Availability of Reference Materials Cited in NRC Publications

Most documents cited in NRC publications will be available from one of the following sources:

1. The NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC 20555-0001
2. The Superintendent of Documents, U.S. Government Printing Office, P. O. Box 37082, Washington, DC 20402-9328
3. The National Technical Information Service, Springfield, VA 22161-0002

Although the listing that follows represents the majority of documents cited in NRC publications, it is not intended to be exhaustive.

Referenced documents available for inspection and copying for a fee from the NRC Public Document Room include NRC correspondence and internal NRC memoranda; NRC bulletins, circulars, information notices, inspection and investigation notices; licensee event reports; vendor reports and correspondence; Commission papers; and applicant and licensee documents and correspondence.

The following documents in the NUREG series are available for purchase from the Government Printing Office: formal NRC staff and contractor reports, NRC-sponsored conference proceedings, international agreement reports, grantee reports, and NRC booklets and brochures. Also available are regulatory guides, NRC regulations in the *Code of Federal Regulations*, and *Nuclear Regulatory Commission Issuances*.

Documents available from the National Technical Information Service include NUREG-series reports and technical reports prepared by other Federal agencies and reports prepared by the Atomic Energy Commission, forerunner agency to the Nuclear Regulatory Commission.

Documents available from public and special technical libraries include all open literature items, such as books, journal articles, and transactions. *Federal Register* notices, Federal and State legislation, and congressional reports can usually be obtained from these libraries.

Documents such as theses, dissertations, foreign reports and translations, and non-NRC conference proceedings are available for purchase from the organization sponsoring the publication cited.

Single copies of NRC draft reports are available free, to the extent of supply, upon written request to the Office of Administration, Distribution and Mail Services Section, U.S. Nuclear Regulatory Commission, Washington DC 20555-0001.

Copies of industry codes and standards used in a substantive manner in the NRC regulatory process are maintained at the NRC Library, Two White Flint North, 11545 Rockville Pike, Rockville, MD 20852-2738, for use by the public. Codes and standards are usually copyrighted and may be purchased from the originating organization or, if they are American National Standards, from the American National Standards Institute, 1430 Broadway, New York, NY 10018-3308.

DISCLAIMER

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

THE COMMISSION

The Commission is responsible for licensing and regulating nuclear facilities and materials and for conducting research in support of the licensing and regulatory process, as mandated by the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and the Nuclear Nonproliferation Act of 1978; and in accordance with the National Environmental Policy Act of 1969, as amended, and other applicable statutes. These responsibilities include protecting public health and safety; protecting the environment; protecting and safeguarding materials and plants in the interest of national security; and assuring conformity with antitrust laws. Agency functions are performed through standards-setting and rulemaking; technical reviews and studies; conduct of public hearings; issuance of authorizations, permits, and licenses; inspection, investigation, and enforcement; evaluation of operating experience; and confirmatory research. The Commission is composed of five members, appointed by the President and confirmed by the Senate, one of whom is designated by the President as Chairman.

Shirley Ann Jackson	Chairman
Greta Joy Dicus	Commissioner
Nils J. Diaz	Commissioner
Edward McGaffigan, Jr.	Commissioner
(Vacant)	Commissioner

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF THE GENERAL COUNSEL

Directs matters of law and legal policy, providing opinions, advice, and assistance to the agency with respect to all of its activities; reviews draft Commission opinions on public petitions seeking direct Commission action and rulemaking proceedings; monitors adjudicatory proceedings, and reviews draft Commission adjudicatory decisions; provides interpretation of laws, regulations, and other sources of authority, and the legal form and content of proposed official actions; represents and advises staff offices in all programmatic activities and administrative litigation in connection with licensing and enforcement; prepares or concurs in all contractual documents, interagency agreements, delegations of authority, regulations, orders, licenses, and other legal documents, and prepares legal interpretations thereof; represents NRC in administrative proceedings related to such matters as personnel, procurement, and EEO; reviews and directs intellectual property work; represents and protects the interest of the NRC in legal matters, in court proceedings, and in relation to other Government agencies, administrative bodies, committees of Congress, foreign governments, and members of the public; provides legal advice to the Commission (including staff), and represents the Commission in courts of appeals proceedings to review Commission orders and rules; and, in cooperation with the Department of Justice, represents the Commission in court proceedings affecting the agency's programs in the Federal district courts and the Supreme Court.

General Counsel Karen D. Cyr
Deputy General Counsel (Vacant)

SOLICITOR

Assists the General Counsel in all aspects as chief legal officer of and legal advisor to the NRC, with primary responsibility in matters involving the supervision of litigation in courts of law; and represents the NRC in Court of Appeals litigation and in conjunction with the Department of Justice in other Federal courts. Provides counsel to NRC employees called to testify concerning official duties in cases in which NRC is not a party. Advises the Commission on litigation of proposed actions.

Solicitor John F. Cordes, Jr.

PROGRAM SUPPORT BRANCH

Provides to the General Counsel program analysis and direction of program support activities. Responsible for program development and evaluation in the areas of resource utilization, and management, and organizational planning and analysis. Provides office services, including personnel, equipment, space, correspondence control, and mail and records control, and maintains law library and legislative reference service functions.

Chief Mary L. Tenaglia

ASSOCIATE GENERAL COUNSEL FOR LICENSING AND REGULATION

Advises the General Counsel and Commission on aspects of domestic licensing and regulation with particular emphasis on adjudication, legislation, rulemaking, and fuel cycle matters. Provides advice on employee conduct and administrative law issues as well as on the implementation of atomic energy and environmental law. Provides legal advice and recommendations regarding high- and low-level radioactive waste disposal, spent fuel storage and transportation issues (except for 11(e)(2) by-product material), including issues arising under the Atomic Energy Act, the Low-Level Radioactive Waste Policy Amendment Act and the Nuclear Waste Policy Act; assists NRC staff in drafting rules and policies relating to waste disposal, ensuring safe and environmentally sound waste disposal and in ensuring safe and environmentally sound spent fuel storage under Part 72.

Associate General Counsel William J. Olmstead

ASSOCIATE GENERAL COUNSEL FOR HEARINGS, ENFORCEMENT, AND ADMINISTRATION

Advises the General Counsel on all licensing, inspection and enforcement activities with particular emphasis on the conduct of adjudicatory hearings, and the implementation of the Commission's enforcement program. Assists the General Counsel in providing legal advice on interagency and international agreements, procurement, intellectual property, security, personnel, and administrative functions. Serves as principal legal advisor to the Commission's staff on adjudication matters before the Commission.

Associate General Counsel Stephen G. Burns

ASSISTANT GENERAL COUNSEL FOR LEGAL COUNSEL, LEGISLATION, AND SPECIAL PROJECTS

Assists the General Counsel in providing legal advice and assistance to the Commission on the review of adjudicatory decisions, on the implementation of employee conduct regulations, and on the development of the Commission's legislative program, including the drafting of proposed legislation for Commission consideration. Advises on the legal and policy implications of legislation proposed by the Commission or referred to the Commission for comment and on the implementation of Federal Advisory Committee Act (FACA) and Government in the Sunshine Act (GISA). Provides legal advice and assistance to OI and OCAA.

Asst. Gen. Counsel.....James A. Fitzgerald
Dep. Asst. Gen. Counsel/
Legislative Counsel.....Irwin B. Rothschild, III

ASSISTANT GENERAL COUNSEL FOR RULEMAKING AND FUEL CYCLE

Assists the General Counsel in: (1) providing legal advice and assistance to the Commission and the NRC staff with respect to the promulgation and amendment of NRC regulations and guides; (2) representing the NRC staff in public rulemaking hearings; (3) interpreting regulations and statutes relevant to NRC activities and providing legal analyses of those authorities impacting the NRC; and (4) providing legal advice and assistance to the Commission and the NRC staff on the licensing of the possession and use of nuclear materials, on safeguards issues, and on "Agreement States" issues. Establishes and maintains effective liaison with citizens groups and industry associations in regard to the Commission's regulatory process; advises the General Counsel on the use of techniques to enhance the participation of citizen groups and industry associations in the development of Commission rulemakings and policies; identifies rulemakings and policy areas in which enhanced participation by citizens groups and industry associations may be needed and useful; and supervises the design and implementation of participatory techniques in the development of specific rulemakings and policies.

Asst. Gen. Counsel.....Stuart A. Treby
Dep. Asst. Gen. Coun. and Special Coun.
for Public Liaison and Agreement States
Programs Francis X. Cameron

ASSISTANT GENERAL COUNSEL FOR HEARINGS AND ENFORCEMENT

(See Page 9)

ASSISTANT GENERAL COUNSEL FOR ADMINISTRATION

Assists the General Counsel in providing legal advice and assistance to the Commission and to NRC offices related to interagency and international agreements, procurement, intellectual property, budget, travel, garnishments, security, personnel, labor, EEO, grants, FOIA, and other administrative matters; and represents NRC in other administrative hearings involving procurement, personnel, personnel security, claims, labor relations, and equal employment opportunity matters.

Asst. Gen. Counsel Donald F. Hassell
Dep. Asst. Gen.
Counsel/Adm. Joseph Rutberg

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF THE GENERAL COUNSEL

ASSISTANT GENERAL COUNSEL FOR HEARINGS AND ENFORCEMENT

Assists the General Counsel in (1) representing the NRC in public hearings conducted in conjunction with the licensing of nuclear reactors/materials users and facilities, and assisting with the development of legal policy associated with such licensing, providing advice and consultation to the staff on health, safety, environmental, and antitrust issues arising from the licensing process; and (2) providing legal advice and assistance to the Commission; regional offices; and the Offices of Enforcement, Investigations, Nuclear Material Safety and Safeguards, and Nuclear Reactor Regulation on inspection and enforcement matters, and advising and representing NRC offices in enforcement proceedings involving imposition of civil penalties, modifications, and suspension or revocation of licenses.

Assistant General Counsel Lawrence J. Chandler

Materials, Antitrust, and Special Proceedings Branch

Represents the NRC in public hearings conducted in conjunction with the licensing of materials users, facilities (including export activities), and nuclear reactors, as well as in enforcement proceedings related to both reactor and materials licensees. Assists in the development of legal policy associated with such licensing, and provides advice and counsel to the staff on health and safety, environmental, and antitrust issues associated with the licensing process. Provides legal analysis and counseling to NRC staff concerning complex technical and factual matters and application thereto of all substantive NRC regulations, orders, licenses and policies, as well as the Commission's procedural regulations in 10 CFR Part 2.

Dep. Asst. General Counsel Dennis C. Dambly

Enforcement Branch

Provides legal advice and assistance to the Commission; regional offices; and the Offices of Enforcement, Investigations, Nuclear Material Safety and Safeguards, and Nuclear Reactor Regulation on inspection and enforcement matters; advises and assists in representing NRC offices in enforcement proceedings against licensees involving imposition of civil penalties and the modification, suspension, or revocation of licenses; and interacts with the Department of Justice on criminal actions associated with NRC enforcement actions. Provides legal analysis and counseling to NRC staff concerning complex technical and factual matters and the application thereto of NRC regulations, orders, generic communications, licenses and policies, such as the Commission's Enforcement Policy set forth in 10 CFR Part 2, Appendix C, of the Commission's regulations. Coordinates legal services and activities for the NRC regional offices.

Dep. Asst. General Counsel Jack R. Goldberg

Advanced Reactor, License Renewal, and Special Proceedings Branch

Represents the NRC in public hearings conducted in conjunction with the licensing of nuclear reactors (including advanced reactors, license renewal, and decommissioning), as well as in enforcement proceedings. Assists in the development of legal policy associated with such licensing, and provides advice and counsel to the staff on health, safety, and environmental issues associated with the licensing process. Provides legal analysis and counseling to NRC staff concerning complex technical and factual matters and application thereto of all substantive NRC regulations, orders, licenses, and policies, as well as the Commission's procedural regulations in 10 CFR Part 2.

Dep. Asst. General Counsel Janice E. Moore

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

SECRETARY OF THE COMMISSION	
Provides executive management services to support the Commission and to implement Commission decisions; advises and assists the Commission and staff on the planning, scheduling, and conduct of Commission business; and maintains the official adjudicatory dockets of the Commission. Directs and administers the NRC history program; and integrates automated data processing and office automation initiatives into the Commission's administrative systems. Manages the Commission Decision Tracking System. The Assistant Secretary performs functions of the Federal Advisory Committee Management Officer and maintains liaison with certain boards and advisory committees.	
Secretary	John C. Hoyle
Assistant Secretary	Annette Vieth-Cook

U.S. NUCLEAR REGULATORY COMMISSION

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF COMMISSION APPELLATE ADJUDICATION
Responsible for monitoring cases pending before presiding officers, providing the Commission with an analysis of any adjudicatory matter requiring a Commission decision (e.g., petitions for review of initial licensing board decisions, certified questions, interlocutory referrals, stay requests) including available options, drafting any necessary decisions pursuant to the Commission's guidance after presentation of options, and consulting with the Office of the General Counsel in identifying options to be presented to the Commission and in drafting the final decision to be presented to the Commission.
Director (Acting) John F. Cordes, Jr.

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

--- Administrative oversight

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

THE CHAIRMAN
<p>The Chairman is the principal executive officer of and the official spokesman for the NRC, as mandated by the Reorganization Plan No. 1 of 1980. As principal executive officer, the Chairman is responsible for conducting the administrative, organizational, long-range planning, budgetary and certain personnel functions of the agency. He/she has ultimate authority for all NRC functions pertaining to an emergency involving an NRC license. His/her actions are governed by the general policies of the Commission.</p>

OFFICE OF CONGRESSIONAL AFFAIRS	
Provides advice and assistance to the Chairman, Commission, and NRC staff on all NRC relations with Congress and views of Congress toward NRC policies, plans, and activities; maintains liaison with congressional committees and members of Congress on matters of interest to NRC; serves as primary contact point for all NRC communications with Congress; reviewing and concurring in all outgoing correspondence to members of Congress; coordinates NRC internal activities with Congress; coordinates development of NRC's legislative program; and monitors legislative proposals, bills, and hearings.	
Director	Dennis K. Rathbun
Associate Director	Linda E. Forner

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

*Walnut Creek
Field Office,
Walnut Creek, CA

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF THE INSPECTOR GENERAL

Provides policy direction for and conducts, supervises, and coordinates audits and investigations relating to all NRC programs and operations; reviews existing and proposed legislation and regulations and makes recommendations concerning their impact on the economy and efficiency of NRC programs and operations, and on the prevention and detection of fraud and abuse in such programs and operations; recommends policies for, and conducts, supervises, or coordinates other activities for the purpose of promoting the economy and efficiency in the administration of, or prevention and detection of fraud and abuse in NRC programs and operations; recommends policies for and conducts, supervises, or coordinates relationships between the NRC and Federal, State, and local agencies, and non-governmental entities relating to the promotion of the economy and efficiency in the administration of, or prevention and detection of fraud and abuse in, NRC programs and operations or identification and prosecution of participants in fraud or abuse; keeps the Chairman and Congress fully and currently informed concerning fraud and other serious problems, abuses, and deficiencies relating to the administration of NRC programs and operations; recommends corrective actions and reports on the progress made in implementing corrective actions; complies with GAO standards for audits of Federal establishments, organizations, programs, activities, and functions; and expeditiously refers criminal matters to the Department of Justice.

Inspector General Hubert T. Bell
Deputy Inspector General David C. Lee

COUNSEL TO THE INSPECTOR GENERAL

Provides authoritative legal advice, assistance, and support to the Inspector General and OIG staff in the areas that support audits, investigations, and other critical and complex OIG activities. Serves as the designated agency Special Counsel for all OIG matters, and as the legal expert on all OIG matters within the agency. Serves as legal advisor and representative for personnel, procurement, and other internal OIG matters. Performs comprehensive reviews and provides commentary on existing and proposed legislation and regulations for their impact on the economy and efficiency of the administration of NRC programs and operations.

Counsel Maryann L. Grodin

Resource Management and Operations Support

Provides all administrative and operations support for Office of the Inspector General (OIG) programs. Administrative support includes budget, personnel, resource management, ADP, space, property, telecommunications, accounting, contracting, small purchases, and security. Provides direct operations support to both the audit and investigative staff. Prepares the OIG Semiannual Report to Congress. Serves as liaison on all President's Council on Integrity and Efficiency matters.

Team Leader Deborah S. Huber

ASSISTANT INSPECTOR GENERAL FOR INVESTIGATIONS

Responsible for directing the performance of investigative activities relating to NRC programs and operations, including the development of policies, standards, and procedures. Conducts and reports on investigations involving fraud, waste, and abuse to ascertain and verify the facts with regard to the integrity of NRC programs and operations; maintains liaison with law enforcement agencies and other investigative organizations in criminal and investigative matters. Conducts investigative-type efforts known as Event Inquiries that involve the examination of events not focusing specifically on individual misconduct.

Assistant Inspector General James E. Childs
Investigative Operations Officer George A. Mulley, Jr.

ASSISTANT INSPECTOR GENERAL FOR AUDITS

Responsible for directing the performance of auditing activities relating to NRC programs and operations. Prepares reports of audits setting forth findings and recommendations for corrective action; determines that reports have been reviewed and properly acted upon and are in accordance with the GAO standards for auditing; and follows up on audit recommendations and brings to the attention of proper officials any matters on which corrective action has not been taken. Performs assessment of the agency's implementation of audit report recommendations.

Assistant Inspector General Thomas J. Barchi
Senior Level Assistant for Policy, Planning
and Reporting Robert W. Shideier

U.S. NUCLEAR REGULATORY COMMISSION

U.S. NUCLEAR REGULATORY COMMISSION

U.S. NUCLEAR REGULATORY COMMISSION

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF NUCLEAR REGULATORY RESEARCH

DIVISION OF SYSTEMS TECHNOLOGY

Plans, develops, and directs comprehensive safety research programs for predicting nuclear reactor and plant systems behavior under normal, accident, and severe accident conditions for current and advanced reactors. Responsibilities include evaluating challenges to containments; development of accident source terms and, accident sequence analysis; and development, coordination, and, in selected cases, advanced reactor safety research. Provides systems research program planning, implementation, and results in response to needs defined for severe accidents and human factors. Provides research to improve NRC's understanding of human performance and to evaluate the safe application of digital instrumentation and control systems. Performs and reviews probabilistic risk assessments, individual plant examinations (IPEs) and reliability assessments. Provides funding guidance to NRC contractors, DOE laboratories, and other government agencies within the division budget. Consistent with NRC policy and to the extent overall agency need exists, maintains liaison and provides technical input in assigned areas to other federal agencies, ANSI, professional societies, international agencies, and other organizations. Maintains broad technical expertise and provides consultation in the relevant systems technology areas.

Director M. Wayne Hodges
Deputy Director Thomas L. King

Control, Instrumentation and Human Factors Branch

Responsible for planning, developing, and directing comprehensive research programs on human factors, human reliability, and advanced instrumentation and controls related to all elements of NRC-regulated nuclear activities. Activities include conducting studies on human performance such as man-machine interfaces, procedures, human performance, qualifications, training, organization, management, and organizational performance, human reliability, advanced instrumentation and controls driven by digital computers, software validation and verification; managing and evaluating generic issues related to operation and human factors; evaluating reactor operations issues; and translating these efforts into effective tools to aid in making licensing and other regulatory decisions and coordinating these research and standards programs with other NRC offices. Develops policies, regulations, guidelines, technical bases, and regulatory analyses to support recommendations and requirements related to such issues. Maintains broad technical expertise and provides consultation to NRC organizations in areas related to human performance, human reliability, and advanced instrumentation and controls.

Chief (Acting) Julius Persensky

Probabilistic Risk Analysis Branch

Performs Probabilistic Risk Analyses (PRA) and reviews full-scope PRA submittals. Uses PRA-based methodologies, models, and analysis techniques to determine overall risk. Responsible for the reviews of the individual plant examinations (IPEs) and the dissemination of IPE results, development of guidance for implementation of the safety goal policy, and development and improvement of operational and human reliability methodology. Provides safety perspectives on plant design and operation by using probabilistic techniques to identify dominant accident sequences leading to core melt and major contributors to these sequences. Responsible for severe accident risk rebaselining. Identifies, reviews, and evaluates internally and externally initiated events to determine the existence of high-risk sequences. Responsible for accident consequence modeling and development of integrated risk analysis methods as well as risk methods improvements. Develops techniques for risk-based regulatory decision making. Provides staff support for risk analysis related to severe accident implementation. Maintains broad technical expertise and provides consultation to NRC organizations in PRA-related areas.

Chief Mark A. Cunningham

Accident Evaluation Branch

Plans, recommends, evaluates, and manages analytical and experimental research programs on accident phenomena of nuclear plants, including advanced reactors. Provides a basis for a regulatory decisions process on severe accidents. Emphasis is on modeling the release and transport of fission products, aerosols and hydrogen, and accident sequences which could cause reactor coolant pressure boundary or containment failure. Programs include development and verification of validated codes and models of in-vessel and ex-vessel phenomena under accident conditions, including the release of non-condensable gases during fuel melt progression, ejection of molten fuel from the primary coolant system, core-concrete interactions, and the burning of hydrogen. Conducts experimental programs on in-vessel and ex-vessel behavior of fuel and fission product aerosols, including fission product chemistry, ex-vessel interactions of molten fuel with coolant, and structural concrete and high-pressure molten fuel ejection, to provide data for development and validation of codes and models as they apply to current operating power reactors and advanced reactor designs. Responsible for work on severe accident, siting policy, and related issues for nuclear power plants. Maintains broad technical expertise and provides consultation to NRC organizations in these specialized areas.

Chief Charles E. Ader

Reactor and Plant Systems Branch

Plans, develops, manages, and participates in analytical and experimental research programs for predicting nuclear reactor and plant systems behavior under normal and accident conditions for current and advanced reactors. Provides an independent basis for regulatory decisions; explores potential new safety issues; and develops and maintains analytical tools used in licensing reviews, evaluation of operational experience, and training. The analytical tools (codes and models) and related experimental work cover the specialized areas of thermal hydraulics, neutronics, and fuel materials behavior, and close contact in these areas is maintained with professional societies, other organizations, and international agencies. Maintains broad technical expertise and provides consultation within NRC in these specialized areas.

Chief Farouk Eltawila

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF NUCLEAR REACTOR REGULATION

Responsible for ensuring the public health and safety through licensing and inspection activities at all nuclear power reactor facilities in the United States. Responsible for the oversight of all aspects of licensing and inspection of manufacturing, production, and utilization facilities (except for facilities reprocessing fuel and performing isotopic fuel enrichment); and receipt, possession, and ownership of source, byproduct, and special nuclear material used or produced at facilities licensed under 10 CFR Part 50. Develops policy and inspection guidance for programs assigned to the regional offices and assesses the effectiveness and uniformity of the Region's implementation of those programs. Identifies and takes action in coordination with the regional offices regarding conditions and licensee performance at such facilities that may adversely affect public health and safety, the environment, or the safeguarding of nuclear facilities and assesses and recommends, or takes action in response to incidents or accidents. Responsible for licensing issues and regulatory policy concerning reactor operators, including the initial licensing examination and requalification examinations; emergency preparedness, including participation in emergency drills with Federal, State, and local agencies; radiation protection; security and safeguards at such facilities, including fitness for duty; and the inspection of nuclear component supplier facilities. NRR responsibilities include the technical review, certification, and licensing of advanced nuclear reactor facilities and the renewal of current power reactor operating licenses.

Director Samuel J. Collins
Deputy Director Frank J. Miraglia, Jr.
Special Assistant Marylee M. Slosson

Special Projects Office

Responsible for oversight, inspection, and licensing actions associated with Millstone.

Director William D. Travers

ASSOCIATE DIRECTOR FOR PROJECTS

Provides overall project management activities related to licensing and inspection of power reactors. Develops programs and guidelines to improve generic technical specifications, develops technical specifications for plants under license review, and provides NRR interpretations of technical specification requirements. Interacts with the other directors to resolve or recommend resolution of policy and office-level programmatic issues.

Associate Director Roy P. Zimmerman

DIVISION OF REACTOR PROJECTS - I, II

(See Page 33)

DIVISION OF REACTOR PROJECTS - III, IV

(See Page 34)

TECHNICAL SPECIFICATIONS BRANCH

(See Page 35)

ASSOCIATE DIRECTOR FOR TECHNICAL REVIEW

Provides management direction of technical evaluations and assessment of technical issues including: systems safety, engineering, operator licensing, licensee and vendor quality programs, risk assessment, and human factors. Performs vendor inspections. Develops and recommends new concepts and revisions to the programs of vendor inspections. Reviews and evaluates quality assurance aspects of nuclear facility licenses, and applications and initial/preoperational test programs, and special test programs. Interacts with the other directors to resolve or recommend resolution of policy on major office-level programmatic issues.

Associate Director (Acting) Brian W. Sheron

DIVISION OF ENGINEERING

(See Page 36)

DIVISION OF SYSTEMS SAFETY AND ANALYSIS

(See Page 37)

DIVISION OF REACTOR CONTROLS AND HUMAN FACTORS

(See Page 38)

DIVISION OF REACTOR PROGRAM MANAGEMENT

Provides overall planning and management direction for the project management and technical review activities associated with advanced standard plant designs, plant license renewals, and non-radiological environmental issues. Implements programs and procedures to systematically assess and screen daily reactor events, recommend immediate corrective plant-specific and generic actions, and coordinate the follow-up events including NRR involvement in augmented inspection teams and incident investigation teams. Manages NRR's generic issues management program. Develops, coordinates, and issues NRC correspondence, e.g., generic letters, bulletins, and information notices, to address generic concerns. Provides project management for non-power reactor activities and for reactors being decommissioned. Develops and oversees the reactor safeguards, emergency preparedness, and radiation protection inspection and licensing programs. Performs licensing reviews and safety evaluations, and interfaces with FEMA for emergency preparedness at reactor facilities. Provides project management for NSSS owners group activities.

Director (Acting) Jack W. Roe
Deputy Director David B. Matthews
Special Assistant Alfred E. Chaffee

SAFEGUARDS BRANCH

(See Page 39)

EMERGENCY PREPAREDNESS AND RADIATION PROTECTION BRANCH

(See Page 39)

GENERIC ISSUES & ENVIRONMENTAL PROJECTS BRANCH

(See Page 39)

DIVISION OF INSPECTION AND SUPPORT PROGRAMS

Develops and oversees inspection program policies, guidance, and practices. Analyzes and evaluates the effectiveness and implementation of the operating reactor inspection program. Coordinates the semi-annual Senior Management Meeting process. Develops and provides oversight of implementation of the Systematic Assessment of Licensee Performance (SALP) program. Conducts Integrated Performance Assessments (as part of the Integrated Performance Assessment Process), diagnostic evaluations, and other multi-disciplinary inspections at licensee facilities as necessary. Performs special reactor inspections and vendor inspections. Develops and recommends new concepts and revisions to the programs of team and vendor inspections. Provides administrative management and coordination of the programs and resources of the office. Establishes priorities, schedules, and resource allocations; performs long- and short-range planning, budget development and execution; and coordinates information resource management activities. Manages NRR funds control and travel expenditures, and acts as central coordinator for internal control. Provides administrative and management support, including human resources management, space management, and management information systems. Manages the NRR Reactor Engineer Intern Program.

OFFICE OF NUCLEAR MATERIAL SAFETY AND SAFEGUARDS

DIVISION OF FUEL CYCLE SAFETY AND SAFEGUARDS

Develops, implements, and evaluates overall agency safety and safeguards policy for fuel cycle, Special Nuclear Material (SNM), and associated waste processing facilities licensed under the Atomic Energy Act of 1954, as amended, or certified in accordance with the Energy Policy Act of 1992. Directs the NRC's principal licensing, certification, inspection, environmental reviews, and regulatory activities associated with these facilities to assure adequate safety and safeguards. Reviews protection afforded weapons-usable SNM in the licensed and license-exempt sectors to maintain comparability. Develops NRC's design basis threats, assesses threats to the domestic environment affecting all NRC licensed activities, and continually reviews the adequacy of design basis threats based on domestic and foreign events and intelligence information. Identifies and takes action to resolve safety and safeguards issues, and directs NRC contingency planning and emergency response operations dealing with accidents, events, incidents, threats, thefts, or radiological sabotage relating to licensed activities under its responsibility. Reviews the international safeguards and physical protection technical aspects of export/import licensing and retransfer requests. Conducts and coordinates NRC activities in support of implementation of International Atomic Energy Agency (IAEA) safeguards at NRC licensed facilities. Conducts efforts to strengthen IAEA safeguards and safeguards in other countries. Provides technical support for training and guidance to NRC regional office licensing and inspection staff.

Director Elizabeth Q. Ten Eyck
Deputy Director E. William Brach

Regulatory and International Safeguards Branch

Establishes requirements and develops technical bases for new safety and safeguards rules and regulatory guidance for NRC licensed fuel facilities; analyzes policy options for fuel cycle safety and safeguards generic issues; and coordinates with AEOD/Technical Training Center (TTC) on fuel cycle safety and safeguards training requirements. Conducts reviews of the international safeguards and physical protection technical aspects of export and import licensing and retransfer requests; conducts technical evaluations of the safeguards provisions of agreements for cooperation; conducts efforts to support the strengthening of IAEA safeguards; conducts, with participation of other U.S. government agencies, onsite reviews of foreign physical protection programs; conducts and coordinates NRC activities in support of implementation of IAEA safeguards at selected NRC-licensed facilities under the US/IAEA Safeguards Agreement; and conducts efforts to enhance safeguards programs in other countries including the republics of the former Soviet Union.

Chief Theodore S. Sherr

Special Projects Branch

Reviews programmatic activities and develops technical and policy options for regulations, regulatory guides, and policy statements associated with the licensing or certification of uranium enrichment facilities and the review of the Hanford Tank Waste Remediation System. Conducts safety, safeguards, and other appropriate reviews; environmental assessments and impact statements; and analyses associated with the regulation and licensing, certification or support to these special projects and activities. Develops and implements certification procedures for gaseous diffusion enrichment plants, in accordance with the Energy Policy Act of 1992. Performs regulatory and technical assistance reviews of the Hanford Waste Tanks. Provides technical support and guidance to the regions regarding licensing or certification of enrichment facilities. Provides technical support for incident management and emergency responses at fuel cycle facilities.

Chief Robert C. Pierson

Operations Branch

Develops and directs implementation of policies and programs for inspection and oversight of fuel cycle facilities. Develops inspection procedures for and conducts criticality, chemical process safety, fire protection, and Material Control and Accounting (MC&A) inspections at fuel cycle facilities. Reviews fuel facility regulatory documents for inspectability. Provides regional oversight, develops policies and procedures for assessing regional performance of fuel cycle licensing, certification and inspection activities, and conducts such assessments. Provides technical support and guidance to the Regions on fuel cycle facility inspection activities. Reviews inspection reports to identify and address safety and safeguards issues. Plans, coordinates, and manages contingency planning and emergency response activities for safety and safeguards events at fuel cycle facilities and assesses fuel cycle facility event reports. Manages the sensitive compartmented information facility at Two White Flint North. Coordinates with the intelligence and law enforcement communities, assesses the threat environment affecting regulated activities, assesses illicit trafficking events, and reviews the adequacy of NRC's design basis threats based on domestic and foreign events and intelligence information. Conducts pattern and trend studies based on analysis of domestic and foreign events. Manages utilization of the Nuclear Materials Management and Safeguards System.

Chief Philip Ting

Licensing Branch

Conducts safety and safeguards analyses and follow-up reviews related to licensing of natural uranium conversion and production plants, SNM and associated waste processing facilities, enriched uranium and plutonium fuel processing, and fabrication facilities; and issues licenses, renewals, and license amendments. Conducts environmental assessments and prepares environmental impact statements related to licensing actions. Provides programmatic direction to the licensing programs in the regions related to these activities. Provides technical support and guidance to the Regions on fuel cycle, SNM, and associated waste processing licensing activities. Reviews programmatic activities and identifies technical and policy options for regulations, regulatory guides, and policy statements associated with licensing of fuel cycle, SNM, and associated waste processing facilities. Provides technical support for safety and safeguards incident management and emergency response at fuel cycle, SNM, and associated waste processing facilities.

Chief Michael F. Weber

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF NUCLEAR MATERIAL SAFETY AND SAFEGUARDS

DIVISION OF WASTE MANAGEMENT

Directs the NRC's program for the regulation of Low-Level Waste (LLW), Decommissioning, Uranium Recovery (UR), and the DOE High-Level Waste (HLW) repository program. Identifies and takes action to control safety issues under its responsibility. Develops, implements, and evaluates safety and environmental policies and long-range goals for these activities. Provides guidance for regional activities relating to waste management and decommissioning. Interacts with other NRC offices, Federal and State organizations, Indian tribes, and other jurisdictions on matters under its cognizance. Represents NRC in international waste management and decommissioning activities. Coordinates research to ensure regulatory commitments are achieved. Serves as the NRC's lead for DOE's Remedial Action Plans.

Director John T. Greeves
Deputy Director Margaret V. Federline

LLW and Decommissioning Projects Branch

Serves as the focal point for implementing the Low-Level Waste (LLW) Program and the Decommissioning Program. Manages the regulatory program for approvals or denials of requests to dispose of radioactive waste at sites other than licensed LLW sites (i.e., 10 CFR 20.2002 requests). Serves as focal point for interactions with the U.S. Environmental Protection Agency. Manages implementation of the Site Decommissioning Management Plan (SDMP). Conducts environmental and safety evaluations related to LLW and decommissioning. This responsibility includes providing technical support for reactor decommissioning and terminating licenses when decommissioning is complete. Reviews licensee financial assurance plans for decommissioning. Issues licenses and license amendments related to LLW sites and sites undergoing decommissioning. Manages power reactor decommissioning after spent fuel has been removed from the spent fuel pool. Implements an active interface program, including ongoing consultation with Federal, State, Indian tribe, and other entities to promote understanding of the LLW and decommissioning programs and to identify and resolve concerns in a timely manner. Provides technical assistance to Agreement States on LLW and decommissioning issues.

Chief John W. N. Hickey

Uranium Recovery Branch

Serves as the focal point for implementation and overall coordination of the Uranium Recovery (UR) Licensing Programs, including interface with DOE and licensees. Responsible for planning and implementing the regulatory programs under the Uranium Mill Tailings Radiation Control Act (UMTRCA). Manages, coordinates, and conducts the safety and environmental reviews of pre-licensing and licensing activities, and the review of documents related to the concurrence and licensing of Title I sites under UMTRCA. Provides necessary planning to enable meeting statutory schedules and milestones, such as the Subpart T radon barrier dates. Plans and directs the program for UR Title II site activities, including mill tailings management and decommissioning that encompasses, (1) oversight and programmatic direction for the UR program, (2) implementation of policies and programs and (3) reviews of UR licensing and inspection programs for technical adequacy and consistency. Provides technical assistance to Agreement States on UR issues.

Chief Joseph J. Holonich

Performance Assessment and High-Level Waste Integration Branch

Serves as the focal point for project management, integration, and overall coordination of the HLW repository program. Responsible for implementation of the regulatory program under the Nuclear Waste Policy Act (NWPA) of 1982, and implementation of the NRC and DOE procedural agreement governing pre-licensing consultation for HLW. As the center for technical expertise in health physics and performance assessment disciplines, conducts technical reviews and provides support to the high-level and low-level waste, decommissioning, and uranium recovery programs. Develops the technical evaluation and assessment methodologies and codes to determine compliance with 10 CFR Parts 40, 60, and 61; 40 CFR Part 191; and other regulatory requirements. Develops guidance with respect to specific technical information required for strategies and methodologies that would be acceptable to demonstrate compliance. Ensures technical completeness, accuracy, and consistency within assigned technical responsibilities. Reviews regulatory requirements and relevant pre-licensing, licensing, and decommissioning documents. Provides technical assistance to States and compacts, as appropriate. Interfaces with the U.S. Environmental Protection Agency and others in the development and implementation of environmental radiation protection standards for high-level waste management and disposal. Responsible for international coordination of performance assessment and health physics activities.

Chief John H. Austin

Engineering and Geosciences Branch

Serves as the focal point for technical expertise in earth sciences, geotechnical, mechanical and structural engineering, and material sciences, related to stabilization and disposal of radioactive wastes. Conducts technical reviews and provides support to high-level and low-level waste, decommissioning, and uranium recovery program. Develops the technical evaluation and assessment methodologies, including subsystem performance assessment models, to assess compliance with NRC regulations and criteria. Develops guidance with respect to specific technical information required for strategies and methodologies to demonstrate compliance with regulatory criteria. Ensures technical completeness, accuracy, and consistency within assigned technical responsibilities. Reviews and evaluates submissions for technical adequacy and compliance with regulatory requirements, including license applications, environmental reports, site characterization plans, and other related pre-licensing, licensing, and decommissioning documents. Performs evaluations of DOE methodologies for stabilization of HLW from residual or "incidental" waste at DOE sites. Responsible for international coordination of engineering and geoscience activities.

Chief Michael J. Bell

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF NUCLEAR MATERIAL SAFETY AND SAFEGUARDS

SPENT FUEL PROJECT OFFICE

Develops and implements the agency's regulatory, licensing, and inspection program for the storage of nuclear reactor spent fuel and the domestic and international transportation of radioactive materials. Serves as the agency lead in spent fuel storage and transportation activities. Develops licensing, certification, and quality assurance review criteria and positions. Manages and conducts the safety and environmental reviews of: (1) commercial spent fuel transportation and storage cask designs, including the certification of storage systems under the general license provisions of 10 CFR Part 72, and (2) interim spent fuel and high-level waste storage facilities, including the licensing of nuclear utility specific facilities, private facilities, and a DOE centralized facility. Manages and conducts the review of the Department of Energy (DOE) applications for storage and transport systems for the civilian high-level radioactive waste program. Conducts the safety evaluations and issues Certificates of Compliance for non-spent fuel transportation packages. Conducts safety inspections of transport packages and spent fuel storage system vendors. Conducts inspections of the implementation of quality assurance programs by users, suppliers, and fabricators of NRC-certified transport packages and dry storage systems. Develops policy, regulations, and guidance for designers, users, and fabricators of NRC-certified transportation packages and dry spent fuel storage casks. Provides technical and policy guidance to the NRC Regions and licensees on transportation and spent fuel storage. Coordinates and develops guidance with other U.S. Government and international agencies on transportation policy and safety issues, and provides guidance to industry and the public. Participates in the development of international transportation and spent fuel storage safety standards. Reviews and provides guidance on transportation physical protection issues. Provides technical support for incident and emergency response.

Director (Acting) Charles J. Haughney
Deputy Director (Acting) Susan F. Shankman

Spent Fuel Licensing Section

Manages the safety and environmental reviews of commercial spent fuel transportation and storage cask designs under 10 CFR Parts 71 and 72, including the certification of storage systems under the general license provisions of 10 CFR Part 72. Manages the safety and environmental reviews of interim spent fuel and high-level waste storage facilities under 10 CFR Part 72, including the licensing of nuclear utility specific facilities, private facilities, and a DOE centralized facility. Manages the review of the Department of Energy (DOE) applications for storage and transport systems for the civilian high-level radioactive waste program.

Chief Eric J. Leeds

Transportation Safety and Inspection Branch

Develops and directs implementation of policies and programs for the certification of non-spent fuel transportation packages, and the inspection of transport package and spent fuel storage system vendors. Coordinates technical and policy guidance for NRC Regions and licensees on transportation and spent fuel storage. Coordinates development of guidance with other U.S. Government and international agencies on transportation policy and safety issues, and provides guidance to industry and the public. Participates in development of international transportation and spent fuel storage safety standards. Coordinates technical support for incident and emergency response.

Chief Susan F. Shankman

Spent Fuel Technical Review Section

Conducts the safety and environmental reviews of commercial spent fuel transportation and storage cask designs under 10 CFR Parts 71 and 72, including the certification of storage systems under the general license provisions of 10 CFR Part 72. Conducts the safety and environmental reviews of interim spent fuel and high-level waste storage facilities under 10 CFR Part 72, including the licensing of nuclear utility specific facilities, private facilities, and a DOE centralized facility. Conducts the review of the Department of Energy (DOE) applications for storage and transport systems for the civilian high-level radioactive waste program.

Chief Fritz C. Sturz

Package Certification Section

Conducts the safety evaluations and issues Certificates of Compliance for non-spent fuel transportation packages under 10 CFR Part 71. This includes transportation containers for UF₆, fresh fuel, oxides, contaminated waste, sealed sources, and Naval Reactor shipments. Develops technical guidance for the design, analysis, fabrication, and operation of non-spent fuel shipping containers. Provides technical support for incident and emergency response.

Chief Ross Chappell

Transportation and Storage Safety Section

Develops policy, regulations, and guidance for designers, users, and fabricators of NRC-certified transportation packages and dry spent fuel storage casks. Provides technical and policy guidance to the NRC Regions and licensees on transportation and spent fuel storage. Develops guidance with other U.S. Government and international agencies on transportation policy and safety issues, and provides guidance to industry and the public. Participates in the development of international transportation and spent fuel storage safety standards. Reviews and provides guidance on transportation physical protection issues. Provides technical support for incident and emergency response.

Chief Earl P. Easton

Transportation and Storage Inspection Section

Conducts safety inspections of transport packages and spent fuel storage system vendors to assess compliance with provisions of license or certificate. Conducts inspections of the implementation of quality assurance programs by users, suppliers, and fabricators of NRC certified transport packages and dry storage systems. Approves quality assurance programs for transportation activities and for fabrication of transportation packagings.

Chief (Vacant)

OFFICE OF STATE PROGRAMS

Responsible for establishing and maintaining effective communications and working relationships between the NRC and states, local governments, other federal agencies and Indian tribe organizations. Serves as primary contact for policy matters between NRC and these external groups. Keeps the agency apprised of these groups' activities as they may affect NRC and conveys to NRC management these groups' views toward NRC policies, plans, and activities. Administers the Agreement States Program; provides training and technical assistance to Agreement States; conducts Agreement State Program reviews. Coordinates liaison with other federal agencies through the Federal Liaison Program.

Director Richard L. Bangart
Deputy Director Paul H. Lohaus

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

— Direct Supervision
 - - - - - Coordination

Special Projects Office
 Inspection and Special Projects
 Director Wayne D. Lanning

REGION I
 Executes established NRC policies and assigned programs relating to inspection, licensing, incident response, governmental liaison, resource management, and human resources.
 Administrator Hubert J. Miller
 Deputy Administrator William L. Axelsson

Office of Investigations Field Office
 Provides investigative support to Region I.
 Director Barry R. Letts

Public Affairs Staff
 Implements NRC policies and programs for Public Affairs in the Region.
 Senior Public Affairs Officer Diane P. Scirenci

Regional Counsel
 Advises the regional administrator on legal issues
 Regional Counsel Bradley J. Fewell

ORA Technical Programs Staff
 Performs the functions of enforcement, state liaison, allegations, and incident response.
 Chief Daniel J. Holody, Jr.

DIVISION OF REACTOR PROJECTS
 Provides implementation policy oversight and direction for the inspection and assessment programs for power reactors, including inspection program management, Systematic Assessment of Licensee Performance (SALP), resident inspection, and allegation follow-up. Serves as the contact with licensees, Headquarters offices, and the public for power reactors in Region I. Provides for prompt onsite response to reactor events.
 Director Charles W. Hehl
 Deputy Director Richard V. Crlenjak

DIVISION OF REACTOR SAFETY
 Performs inspections of operations, training, electrical, chemical, mechanical, nuclear, human factors, engineering/human performance, nuclear physics, risk assessment and management, management and QA/QC systems, facility operations, maintenance, radiation protection, environmental, emergency preparedness, and security for all power reactor programs. Conducts the operator licensing function for power reactor facilities. Conducts non-power reactor inspection program. Reviews QA, emergency preparedness, and security program changes. Serves as the focal point for coordinating with technical counterparts and referring potentially generic insights to Headquarters.
 Director James T. Wiggins
 Deputy Director Larry E. Nicholson

DIVISION OF NUCLEAR MATERIAL SAFETY
 Provides implementation policy oversight and direction for the Materials Safety Licensing and Inspection Programs, and Agreement State reviews. Manages site decommissioning activities. Provides for prompt onsite response to events at materials facilities and at sites in decommissioning. Manages enforcement and allegation followup for materials licensees and sites in decommissioning. Manages the fixed and mobile radiological laboratories in support of the materials inspection, decommissioning, and reactor confirmatory measurements programs.
 Director A. Randolph Blough
 Deputy Director George C. Pangburn

DIVISION OF RESOURCE MANAGEMENT
 Performs administrative functions in human resource management, contract administration, budget and fiscal management, ADP services, space and property management, telecommunications, and general administrative services, including license fee management and FOIA processing.
 Director James H. Joyner

 Operator Licensing and Human Performance Branch
 (see page 48)

Decommissioning and Laboratory Branch
 Performs project management, licensing, and inspection of decommissioning activities at SDMP sites, fuel facilities, and power and non-power reactor sites. Manages the fixed and mobile radiological laboratory activities in support of the materials inspection, decommissioning, and reactor confirmatory measurements programs.
 Chief Ronald R. Bellamy
 Nuclear Material Safety (Medical) Branch 1-3
 Performs licensing and inspection activities for nuclear materials licensees, such as medical institutions and private practices, broad scope academic and research licensees, source and special nuclear materials users, manufacturing and distribution licensees, radioactive waste disposal services, and sealed sources in industrial applications to include irradiators, radiographers, fixed and portable gauges, and well logging.
 Chief Mohamed M. Shanbaky
 Nuclear Material Safety (R&D/Academic) Branch No. 2
 Chief John D. Kinneman
 Nuclear Material Safety (Commercial/Industrial) Branch No. 3
 Chief Francis M. Costello

Human Resources Staff
 Provides and coordinates regional human resource services, including training, staffing, employee benefits, and labor relations.
 Personnel Officer Leonard H. Carsley
 Resource Management Branch
 Performs all fiscal activities for the Region including budget formulation and execution, accounting, procurement, contract management, travel services, license fee reporting, ADP services, information management services, and LAN administration.
 Chief Robert J. Gross
 Administrative Services Branch
 Provides administrative services including word processing, printing and reproduction, building, and personnel security. Manages records, files, FOIA, telecommunications, mail, library, document control, and vehicle functions. Provides property management and space utilization services.
 Chief Thomas L. Harrison

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

REGION I

DIVISION OF REACTOR PROJECTS

Reactor Projects Branches 1-8

Implements the inspection program for power reactors including maintaining the Master Inspection Planning System (MIPS) and the Inspection Followup System (IFS), supporting the Executive Plant Performance Review (EPPR) meeting, and managing and participating in inspections. Performs licensee assessments, including SALPs, and supports Senior Management Meetings. Implements the Enforcement Policy. Responds to operating events. Performs inspections and allegation followup. Develops generic correspondence. Coordinates Commission visits to reactor sites and responds to public inquiries.

Reactor Projects Branch 1

Chief Lawrence T. Doerflin

Reactor Projects Branch 2

Chief John F. Rogge

Reactor Projects Branch 3

Chief James C. Linville

Reactor Projects Branch 4

Chief Clifford J. Anderson

Reactor Projects Branch 5

Chief Curtis J. Cowgill, III

Reactor Projects Branch 6

Chief Jacque P. Durr

Reactor Projects Branch 7

Chief Peter W. Eselgroth

Reactor Projects Branch 8

Chief Richard J. Conte

DIVISION OF REACTOR SAFETY

Radiation Safety Branch

Performs inspections and technical reviews of radiation protection for power reactors. Interfaces with other NRC offices and Federal and State agencies in the resolution of generic and pertinent case issues related to radiological effluent treatment system, and the environment. Performs systematic assessments of licensee performance of licensee radiological protection programs. Implements and manages the non-power reactor inspection program. Supports reactive response to occurrences at facilities.

Chief John R. White

Emergency Preparedness and Safeguards Branch

Performs inspections and technical reviews of Emergency Preparedness and Security program activities. Performs reviews of Emergency Plan and Security Plan changes and evaluates State and local emergency plans through coordination with the FEMA. Maintains the NRC Thermoluminescence dosimeter (TLD) national environmental direct radiation monitoring network. Performs systematic assessment of licensee performance in the above areas. Establishes and maintains liaison with applicable local, State, and Federal law enforcement agencies for licensee facilities, and establishes transportation route contingency planning and local law enforcement coordination along shipment routes. Supports reactive response to occurrences at facilities.

Chief Michael C. Modes

Systems Engineering Branch

Performs inspections and technical reviews of plant engineering activities; conducts inspections and evaluations of reactor systems, auxiliary systems, reactor physics, emergency core cooling systems, containment systems, the steam and power conversion systems, and plant fluid system components important to safety. Conducts inspections of inservice testing programs, procurement, and commercial grade dedication activities and maintains cognizance of licensee and NRC risk assessment activities. Supports reactor response to occurrences at facilities. Performs systematic assessments of licensee performance in the above areas.

Chief Eugene M. Kelly

Civil, Mechanical and Materials Engineering Branch

Performs inspections and technical reviews of the materials, materials testing, and structural aspects of plant design and modifications; material failure analyses; inservice inspection data and practices; compliance with fabrication and installation codes; and chemical engineering issues. Performs systematic assessments of licensee performance in the above areas. Supports reactive response to occurrences at facilities. Manages the NRC Nondestructive Examination (NDE) program.

Chief William J. Lazarus

Electrical Engineering Branch

Performs inspections and technical reviews of plant onsite and offsite electrical power distribution systems, instrumentation, and process controls for safety-related systems. Evaluates fire protection programs and provides technical support for fire protection, fire engineering, and equipment qualification activities. Performs systematic assessments of licensee performance in the above areas. Supports reactive response to occurrences at facilities.

Chief William H. Ruland

Operator Licensing & Human Performance Branch

Reviews operator licensing activities at power reactors including the administration of the initial and upgrade examinations for all operators. Assures that NRC examinations and the licensee's training and testing comply with the agency's guidelines. Inspects facility requalification programs, emergency and other operating procedures and conducts operational evaluations. Evaluates and inspects maintenance activities, surveillance programs, training programs, and plant events with human performance implications. Performs systematic assessments of licensee performance in the above areas. Conducts QA inspections and reviews QA reports and changes. Supports reactive response to occurrences at facilities.

Chief Glenn W. Meyer

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

U.S. NUCLEAR REGULATORY COMMISSION

REGION III

DIVISION OF REACTOR PROJECTS

Reactor Projects Branches 1-7

Performs project management for routine and reactive inspections of power reactors during all phases of construction, testing, operation, or decommissioning. Implements the inspection program for power reactors including maintaining the Master Inspection Planning (MIP) and the Inspection Followup System (IFS). Supports the Executive Plant Performance Review (EPPR) meeting and manages and participates in inspections. Performs licensee assessments including SALPs and supports Senior Management meetings. Implements the enforcement policy. Responds to operating events. Develops generic correspondence. Coordinates Commission visits to reactor sites and responds to public inquiries.

Reactor Projects Branch 1	Wayne Kropp
Reactor Projects Branch 2	Marc Dapas
Reactor Projects Branch 3	Roger D. Lanksbury
Reactor Projects Branch 4	John M. Jacobson
Reactor Projects Branch 5	Michael Jordan
Reactor Projects Branch 6	Bruce L. Burgess
Reactor Projects Branch 7	James McCormick-Barger

DIVISION OF REACTOR SAFETY

Operator Licensing Branch

Reviews operator licensing activities at power reactors including the administration of the initial and upgrade examinations for all operators. Ensures that NRC examinations and the licensee's training and testing costs are within the Agency's guidelines. Inspects facility qualification programs, emergency, and other operating procedures and conducts operational evaluations.

Chief	Melvin N. Leach
Lead Engineers Branch	
Performs inspections and evaluations in areas of maintenance and engineering (such as mechanical, electrical, ISI, ISI, civil, and fire protection).	

Chief	Mark A. Ring
Engineering Specialist Branch 1	
Performs inspections and technical reviews of plant engineering activities; conducts inspections and evaluation of reactor systems. Supports reactor response to occurrences at facilities. Performs systematic assessment of licensee performance.	

Chief	James A. Gavula
Engineering Specialist Branch 2	
Performs inspections and technical reviews of plant engineering activities; conducts inspections and evaluation of reactor systems. Supports reactor response to occurrences at facilities. Performs systematic assessment of licensee performance.	

Chief	Ronald M. Gardner
Plant Support Branch 1	
Performs inspections and technical reviews of Emergency Preparedness and Security program activities. Performs reviews of Emergency Plan and Security Plan changes. Evaluates State and local emergency plans through coordination with FEMA, State and local government officials, and law enforcement organizations. Supports response to occurrences at facilities.	

Chief	James R. Creed
Plant Support Branch 2	
Performs inspections and technical reviews of radiation protection for power reactors. Interfaces with other NRC offices and Federal and State agencies in the resolution of generic and case related issues to radiological effluent treatment systems, and the environment. Performs SALP of licensee radiological protection programs. Implements and manages the non-power reactor inspection program. Supports reactive response to occurrences at facilities.	

Chief Thomas Kozak

DIVISION OF NUCLEAR MATERIAL SAFETY

Material Licensing Branch

Performs safety oversight of nuclear byproduct materials licensees by licensing facilities (e.g., hospitals, medical clinics, universities, industrial, research, research development), activities, and personnel.

Chief (Acting)	Kevin G. Null
----------------	---------------

Material Administrative Support Branch

Performs regional administrative functions related to the creation and processing of new and amended nuclear material licenses. Provides assistance to the Material Licensing and Inspection Staff in the areas of word processing, records and files maintenance for the Nuclear Materials Docket Room, mail tasks, data entry, and the creation of reports using the Licensing Tracking System.

Chief	Marianne Meenan
-------	-----------------

Material Inspection Branch 1

Performs nuclear material licensing inspection activities for medical, industrial, and research and development licenses.

Chief	John R. Madera
-------	----------------

Material Inspection Branch 2

Performs nuclear material licensing inspection activities for medical, industrial, and research and development licenses.

Chief	Monte Phillip
-------	---------------

Fuel Cycle Branch

Performs project management for routine and reactive safety oversight of all fuel cycle and uranium enrichment plants through implementation of resident and region-based inspection programs.

Chief	Gary Shear
-------	------------

Decommissioning Branch

Performs project management and inspection of facilities and sites in various stages of complex decommissioning activities. Manages and operates radiological support services for the Region. Conducts nonpower reactor inspection program.

Chief	Bruce Jorgensen
-------	-----------------

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF SMALL BUSINESS AND CIVIL RIGHTS

Provides overall policy program evaluation and management direction for small business, civil rights, affirmation action, and federal women's program areas. Develops and implements an effective small business program in accordance with the Small Business Act as amended. Ensures that appropriate consideration is given to women and minority business enterprises. Maintains liaison with other government agencies and trade associations. Administers the Historically Black Colleges and Universities Program pursuant to the Executive Order. Develops and recommends for approval by the Deputy Executive Director for Management Services the overall NRC policy providing for equal employment opportunity in all aspects of federal employment practices. Develops, monitors, and evaluates the Affirmative Employment Program plan to ensure compliance with NRC policy. Coordinates efforts with appropriate NRC offices. Serves as contact with local and national public and private organizations to facilitate the NRC Equal Employment Opportunity Program.

Director	Irene P. Little
Small Business Program Manager	Voneree Deloach
Civil Rights Program Manager	Edward E. Tucker
Affirmative Action Program Manager	Barbara D. Williams

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF ADMINISTRATION

DIVISION OF FACILITIES AND SECURITY

Establishes policy and plans and directs the agency's real property and building management programs. Provides overall direction and project management for operation and maintenance of NRC Headquarters buildings, and provides direct support to regional offices on space planning, acquisition, and facility-related matters, as requested. Coordinates NRC interaction with GSA, other Federal and State agencies and local governments concerning real property. Plans, develops, establishes, and administers policies, standards, regulations, and procedures for the overall NRC security program. Included are responsibilities for (1) ensuring the safeguarding of classified and sensitive unclassified information at NRC Headquarters facilities, regional offices, and at NRC contractors, licensees, certificate holders, and other facilities; (2) providing advice, guidance, and other assistance on all aspects of the NRC security program; (3) physically protecting of NRC Headquarters, regional offices, and other facilities; (4) managing Personnel Security Program; (5) the managing of the Secure Communication Center; and (6) administering of NRC's Drug Testing Program.

Director Raymond J. Brady
Deputy Director Richard A. Dopp

Personnel Security Branch

Administers the Personnel Security Program which includes making determinations on the initial and continuing eligibility of NRC applicants, consultants, and employees for access authorizations/employment clearance and of contractors, licensees, and other persons for access to Restricted Data and National Security Information; administers the Classified Visitor Control Program, and maintains liaison with OPM, FBI, CIA, and other investigative or intelligence agencies on personnel security matters; administers the Material Access Authorization Program as it relates to special nuclear material access authorization; administers the processing of licensee FBI criminal history checks; administers the NRC Reinvestigation Program; serves as the DFS focal point for the Privacy Act Program; and administers the NRC Drug Testing Program.

Chief James J. Dunleavy

Facilities Branch

Establishes policies, standards, and procedures for NRC-wide space and buildings acquisition and utilization. Provides and coordinates support services for NRC Headquarters buildings. Operates, manages, and administers NRC Headquarters buildings under the terms established by the GSA delegation program. Provides direct support to regional offices on matters concerning space planning and acquisition and other facility related matters as requested. Maintains liaison with GSA, other Federal agencies, and State and local governments concerning space, and facilities. Administers the Facilities Security Program to protect classified and sensitive unclassified information; establishes physical security safeguards for the protection of Headquarters, regional offices, and contractor facilities; conducts security reviews and inspections of NRC and other facilities; directs the Security Infraction-Violation Program; and manages the NRC access control and badging system.

Chief Louis Fisher

Information Security Branch

Administers the Information Security Program to protect classified and sensitive unclassified information through policy development and on-site inspections, reviews and appraisals. Administers the NRC's Mandatory Declassification Program. Develops and implements NRC's Technical Security Program and the Security Awareness Program. Manages the NRC Counterintelligence Program; provides daily intelligence support to the Commission; and administers the NRC Foreign Disclosure of Information Program. Manages NRC's secure telecommunications programs; is the NRC Central Office of Record for agency Communications Security (COMSEC) material; and operates the NRC's Secure Communications Center. Develops and manages the NRC Fuel Cycle and Reactor Security Support Program and the Foreign Ownership, Control or Influence Program for NRC regulated or contractor facilities requiring access to classified information and material.

Chief A. Lynn Silvious

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

U.S. NUCLEAR REGULATORY COMMISSION

ORGANIZATIONAL CHART

U.S. NUCLEAR REGULATORY COMMISSION

OFFICE OF THE CHIEF INFORMATION OFFICER

Plans, directs, and oversees the delivery of centralized information technology (IT) infrastructure, applications, and information management (IM) services, and the development and implementation of IT and IM plans, architecture, and policies to support the mission, goals, and priorities of the agency. Represents the NRC on the Federal CIO Council and serves as a member of NRC's Executive Council. Advances the achievement of NRC's mission by assisting management in recognizing where IT can add value while transforming or supporting agency operations. Provides principal advice and assistance to the Chairman, the Commissioners, and other agency executives to ensure that agency IT and IM resources are selected and managed in a manner that maximizes their value, manages risks, and is consistent with Federal laws and regulations.

Chief Information Officer Anthony J. Galante
Deputy Chief Information Officer (Vacant)

PLANNING AND PROGRAM SUPPORT DIVISION

Responsible for the direction and coordination of agency-wide information resources planning, including development of IT and IM goals and measures, development of an agency IT architecture, assessment of technology trends and their applicability to NRC business needs, direction of planning and requirement studies for new IT that supports agency business needs, and management of the agency's IT Capital Planning and Investment Control process. Coordinates agency IT and IM program evaluation, development of agency IT and IM policy, and development and implementation of agency IT training. Directs NRC's computer security program, which implements administrative, technical, and physical security measures for the protection of NRC's information, automated information systems, and IT infrastructure. Directs general administrative and resource management functions, including budget, financial management, personnel, and acquisition support. Develops coordinated responses to Commission, Office of Management and Budget, and congressional inquiries and coordinates activities associated with NRC's participation in the Federal CIO Council.

Director Francine F. Goldberg

Financial Management, Computer Security,
and Administrative Support Staff

Technology Assessment Staff

(See Page 67)

Chief Pamela G. Kruzic

Policy, Planning, and Acquisition Support Branch

(See Page 67)

Chief (Acting) Jesse L. Cloud

INFORMATION TECHNOLOGY INFRASTRUCTURE DIVISION

Responsible for the development, integration, implementation, management, and support of the agency's IT infrastructure. Manages and operates the agency's Customer Support Center, which functions as a single point of contact for service questions, infrastructure service requests, problem reporting, and request status. Responsible for the operation and support of agency-wide application systems, agency computer facilities, and timesharing services. Provides operations and administrative support for agency networks and communications systems and support for the NRC Operations Center. Responsible for installation, maintenance, and support of all agency desktop systems. Provides hardware and software maintenance, support, and acquisition services. Develops components of the agency's IT architecture pertaining to the IT infrastructure. Provides technical guidance and direct assistance as needed to Headquarters and regional offices concerning implementation of agency-wide application systems and IT infrastructure issues and practices. Serves as a liaison with application development teams and coordinates program office infrastructure development, operations, and support requirements.

Director James B. Schaeffer

APPLICATIONS DEVELOPMENT DIVISION

Responsible for the development and maintenance of a comprehensive IT applications management program to support the mission and program activities of the NRC. Coordinates all agency IT applications development activities to ensure that applications are efficiently developed in accordance with plans and allocated resources on an agency-wide basis. Formulates approaches to provide appropriate IT solutions to application development problems confronting the agency. Enforces methodologies to guide all agency activities throughout the entire applications life cycle. Develops components of the agency's IT architecture pertaining to software engineering and development tools, database management systems, and document management systems. Provides technical guidance and direct assistance as needed to Headquarters and regional offices concerning implementation of agency-wide application systems and systems development practices. Provides technical advice, consultation, and review for applications developed and/or managed directly by program offices. Performs data administration and database management system activities.

Director Arnold E. Levin

Chief Karen M. VanDuser

INFORMATION MANAGEMENT DIVISION

Responsible for the organizational and electronic integration of agency IM functions within the Office of the Chief Information Officer and for providing agency-wide IM services. Plans, organizes, and directs programs and resources for the search, retrieval, and dissemination of agency information to the staff and the public through Public Document Rooms, the File Center, and the Freedom of Information Act Programs. Develops policy and manages the agency's Privacy Act Program for the collection, maintenance, and disclosure of personal information. Plans, directs and delivers scientific and technical library services. Develops and administers the agency's information collection budget and manages the agency's records, forms, and correspondence management programs. Manages a centralized system for the receipt, processing, distribution, and the electronic search and retrieval of internally and externally generated agency documents. Manages duplication, reproduction, and graphics services to the NRC. Provides agency-wide electronic publishing policies and services, including NRC's World Wide Web internal and external sites.

Director Lynn B. Scattolini
