HOW TO OBTAIN EIA PRODUCTS AND SERVICES

For further information on any of the following services, or for answers to energy information questions, please contact EIA's National Energy Information Center:

National Energy Information Center (NEIC)	(202) 586-8800
Energy Information Administration	(202) 586-0727 (fax)
Forrestal Building, Room 1F-048	TTY: (202) 586-1181
Washington, DC 20585	E-mail: infoctr@eia.doe.gov

Electronic Products and Services

EIA's Internet Site Services offer nearly all EIA publications. Users can view and download selected pages or entire reports, search for information, download EIA data and analysis applications, and find out about new EIA information products and services.

World Wide Web: <http://www.eia.doe.gov> Gopher: <gopher://gopher.eia.doe.gov> FTP: <ftp://ftp.eia.doe.gov>

EIA also offers a listserve service for EIA press releases and other short documents. Sign up on the EIA World Wide Web site.

EIA's CD-ROM, *Energy InfoDisc*, contains most EIA publications, several databases, and an energy forecasting model. The *Energy InfoDisc*, produced quarterly, is available for a fee from STAT-USA, Department of Commerce, 1-800-STAT-USA.

The Comprehensive Oil and Gas Information Source (COGIS), a bulletin board service, contains data files from most of EIA's oil- and gas-related reports. It is available for a fee from STAT-USA, on 1-800-STAT-USA.

EIA's Electronic Publishing System (EPUB) bulletin board contains data files, directories, and forecasts from most EIA reports. It can be accessed free of charge by dialing (202) 586-2557.

Many of EIA's data files and modeling programs are available for sale on diskette, tape, or cartridge, through either the National Technical Information Service or the Office of Scientific and Technical Information, Department of Energy. Contact NEIC for information on specific products, sources, and media, and ordering instructions.

Printed Publications

EIA directories are available free of charge from NEIC. Recent periodicals and one-time reports are available from the Government Printing Office. Older reports are available from the National Technical Information Service:

Superintendent of Documents	National Technical Information Service
U.S. Government Printing Office	U.S. Department of Commerce
P.O. Box 371954	Springfield, VA 22161
Pittsburgh, PA 15250-7954	5285 Port Royal Road
(202) 512-1800; (202)-512-2250 (fax)	(703) 487-4650; (703) 321-8547 (fax)

Released for Printing: April 1, 1998

Printed with soy ink on recycled paper

Questions concerning the contents of this report should be directed to Michael J. Grillo, (202) 586-6577.

International Petroleum Statistics Report

March 1998

MASTER

Energy Information Administration
Office of Energy Markets and End Use
U.S. Department of Energy
Washington, DC 20585

DISTRIBUTION OF THIS DOCUMENT IS UNLIMITED

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the U.S. Department of Energy. The information contained herein should be attributed to the Energy Information Administration and should not be construed as advocating or reflecting any policy position of the Department of Energy or any other organization.

Preface

The International Petroleum Statistics Report is a monthly publication that provides current international oil data. This report is published for the use of Members of Congress, Federal agencies, State agencies, industry, and the general public. Publication of this report is in keeping with responsibilities given the Energy Information Administration in Public Law 95-91 (Section 205(a)(2)) that states:

"The Administrator shall be responsible for carrying out a central, comprehensive, and unified energy data and information program which will collect, evaluate, assemble, analyze and disseminate data and information ..."

The International Petroleum Statistics Report presents data on international oil production, demand, imports, and stocks. The report has four sections. Section 1 contains time series data on world oil production, and on oil demand and stocks in the Organization for Economic Cooperation and Development (OECD). This section contains annual data beginning in 1985, and monthly data for the most recent two years. Section 2 presents an oil supply/demand balance for the world. This balance is presented in quarterly intervals for the most recent two years. Section 3 presents data on oil imports by OECD countries. This section contains annual data for the most recent year, quarterly data for the most recent two quarters, and monthly data for the most recent twelve months. Section 4 presents annual time series data on world oil production and oil stocks, demand, and trade in OECD countries. World oil production and OECD demand data are for the years 1970 through 1996; OECD stocks from 1973 through 1996; and OECD trade from 1986 through 1996.

Data for the United States are developed by the Energy Information Administration's (EIA) Office of Oil and Gas. Data for other countries are derived largely from published sources, including International Energy Agency publications, the EIA International Energy Annual, and the trade press. (See sources after each section.) All data are reviewed by the International Statistics Branch of EIA. All data have been converted to units of measurement familiar to the American public. Definitions of oil production and consumption are consistent with other EIA publications.

General information about this publication may be obtained from W. Calvin Kilgore, Director, Office of Energy Markets and End Use, (202) 586-1617, and from Louis D. DeMouy, Director, Integrated Energy Statistics Division, (202) 586-6557. Detailed questions and comments concerning the contents of the International Petroleum Statistics Report may be directed to Michael J. Grillot, Team Leader, International Energy Statistics Team, (202) 586-6577; Patricia A. Smith (202) 586-6925, or to H. Vicky McLaine (202) 586-9412; Oil Market Chronology - Douglas MacIntyre (202) 586-1831.

Historical revisions reflect changes to data that were published in the International Energy Annual 1996, which is also available on the EIA Home Page (<http://www.eia.doe.gov/cmem/ica/contents.html>).

Oil Market Chronology - February 1998

The following chronology lists international events of potential significance for world petroleum markets. Sources include: Dow Jones (DJ), the New York Times (NYT), the Washington Post (WP), and the Wall Street Journal (WSJ).

- February 1** A U.S. federal judge denies a preliminary injunction requested by civil rights lawyers that would have removed California-based Unocal Corporation from a \$1.2 billion pipeline project in Burma. The lawsuit alleges a variety of human rights violations by the Burmese government in connection with the project. The judge's ruling states that prohibiting Unocal's participation in the project would not stop the human rights abuses claimed in the lawsuit. President Clinton imposed trade and economic sanctions on Burma in April 1997, but the ban did not affect existing investments. Unocal holds a 28 percent share in the pipeline project, which is being constructed from Burma to Thailand. (DJ)
- United Nations (U.N.) Secretary-General Kofi Annan calls for an increase in the amount of oil Iraq can sell under the U.N.-sponsored oil-for-food program. Annan recommends raising the sales limit from \$2.14 billion every six months to \$5.2 billion. The recommendation now moves to the U.N.'s 15-member Security Council for approval. (WP)
- February 2** Western partners in the Caspian Pipeline Consortium have frozen funds for a \$2 billion pipeline and are pushing for a shake-up in the Consortium's Russian-led management. The 900-mile pipeline will eventually transport 1.4 million barrels of oil per day from Kazakhstan's Tengiz oil field through Russia to the Black Sea port of Novorossiysk. Oil shipments were scheduled to begin in late 1999, but will likely be delayed at least one year as a result of this latest development. Continued funding of the project was contingent upon the Consortium obtaining Russian rights of way and various federal and local permits for the pipeline by the end of 1997. During a meeting in December 1997, the Western partners discovered that much of this work had not been completed. (WSJ)
- February 3** Azerbaijan's state oil company Socar and U.S.-based Conoco announce an agreement to conduct a joint study of Azerbaijan's natural gas processing industries. The study will examine the commercial viability of gathering, processing, and transporting Azerbaijan's natural gas and natural gas liquids for export and domestic use. The study will be conducted over a period of six months. (DJ)
- Russia's RAO Gazprom has sold its 10 percent stake in Centgas, a consortium set up to construct a \$2 billion Turkmenistan-Afghanistan-Pakistan natural gas pipeline. U.S.-based Unocal Corporation acquired 7 percent of Gazprom's shares, bringing its total stake in the Centgas to 54 percent. The remaining 3 percent went to Japanese-owned Indonesia Petroleum and Itochu, South Korea's Hyundai Engineering & Construction Company, and Pakistan's Crescent Group. The 800-mile pipeline will extend from the Daulatabad gas field in southeastern Turkmenistan through Afghanistan to Pakistan. (DJ)
- February 4** General Motors and Amoco Corporation announce a groundbreaking partnership to jointly develop clean-burning motor vehicle fuels. The partnership is the first of its kind between an automaker and an oil company. General Motors Vice Chairman Harry Pearce says that cleaner diesel fuels and cleaner-burning reformulated gasoline are necessary for the success of future hybrid vehicles, which will run on a combination of gasoline and electricity. (WSJ) (DJ)
- General Motors, Chrysler Corporation, and Ford Motor Company announce that they will participate in the Environmental Protection Agency's National Low Emission Vehicle Program. The Program requires automakers to build cars that will be 70 percent cleaner than current models. In exchange for the voluntary participation of the car companies, eight Northeastern states and the District of Columbia gave up the right to adopt higher California emissions standards. The automakers will begin producing the cleaner cars in 1999 in the Northeast and two years later in the rest of the country. Ten foreign automakers have agreed to participate as well, including Honda, Toyota, Nissan, BMW, Mercedes, Saab, Subaru, Suzuki, Volvo, and Rolls Royce. (NYT) (WP) (DJ)
- February 5** Following a ruling by a federal judge denying a request from environmentalists and Native Americans seeking to block the sale of the Elk Hills Naval Petroleum Reserve, the U.S. Department of Energy formally transfers ownership of the reserve to Occidental Petroleum Corporation. Occidental purchased a 78 percent interest in the field for \$3.65 billion. Chevron Corporation currently holds the remaining 22 percent. Elk Hills contains 450 million barrels of proven oil reserves; however, officials from Occidental believe the reserve may contain one billion barrels of recoverable reserves. (DJ)

- February 5** Norway's state oil company Statoil AS and its partners will invest \$400 million to expand the development of Venezuelan oil field LL 652. The investment will cover the first phase of the expansion designed to increase production from 10,000 barrels per day to 115,000 barrels per day over the next ten years. The field's recoverable reserves are estimated at 500 million barrels. Statoil and Chevron each hold a 30 percent interest in the project with Phillips and Atlantic Richfield each holding 20 percent. (DJ)
- The United Kingdom's Hardy Oil & Gas announces the discovery of a major new natural gas field in the South West Mian concession onshore Pakistan. The exploration well Sawan-1, operated by Austria's OMV, produced a flow rate of 58 million cubic feet per day. Reserves are estimated at approximately 918 billion cubic feet. Commercial development is expected to begin in 1998, and initial production is to start by the end of 1999. Hardy and Pakistan Petroleum Limited each hold a 30 percent interest in the concession, with OMV holding a 25 percent interest. (DJ)
- February 6** Iraq rejects key parts of United Nations (U.N.) Secretary-General Kofi Annan's proposal to increase the amount of oil Iraq is permitted to sell under the U.N.'s oil-for-food program from \$2.14 billion to \$5.2 billion. In a letter to Annan, Iraqi Foreign Minister Mohammed Saeed al-Sahhaf objects to additional funds to pay for U.N. monitoring, proposals to repair electric power stations in northern Iraq, and plans for U.N. agencies to target aid to specific groups such as the poor and children. Al-Sahhaf writes that the Iraqi government should deliver the aid and determine which power stations are repaired not the U.N. (WP) (DJ)
- February 9** In a letter to United Nations (U.N.) Secretary-General Kofi Annan, Iraqi Foreign Minister Mohammed Saeed al-Sahhaf informs the U.N. that Iraq can only export up to \$4 billion of oil in six months. The letter is a response to Annan's recommendation to the U.N. to allow Iraq to increase the amount it can export under the oil-for-food program from \$2.14 billion to \$5.2 billion. In addition, al-Sahhaf writes that a larger share of the oil sales should go towards humanitarian aid, while the amounts funding U.N. programs and a compensation fund for Persian Gulf war victims should be reduced. (DJ)
- Georgian President Eduard Shevardnadze escapes an assassination attempt as he is headed home in Tbilisi, Georgia's capital. This represents the second assassination attempt against him in three years. Shevardnadze is not injured, but two bodyguards are dead and four others seriously wounded. Shevardnadze suggests that the attack could have been related to his country's attempt to be part of a pipeline route transporting Caspian Sea oil to the Black Sea. (WP)
- February 10** The United Nations (U.N.) approves 34 oil contracts submitted by Iraq which will meet its \$2 billion quota under the third phase of the U.N.-sponsored oil-for-food program. The 34 contracts total 151.8 million barrels of oil. Iraq exported 121.1 million barrels during the first phase and 127.3 million barrels during the second. The increase in volume is due to weakening oil prices on international markets. (DJ)
- President Fidel Ramos signs into law legislation deregulating the country's oil industry. It is the last major structural reform sought by the International Monetary Fund (IMF) before it allows the Philippines to withdraw from its current IMF borrowing program. The new law provides for a five-month transition period before full deregulation and a \$73 million buffer fund that can be used to subsidize certain petroleum products. (DJ)
- Energy Africa Limited, a South African oil and gas exploration company, announces the discovery of oil off the coast of Congo about 10 miles southwest of the Nkossa oil field. The Bilondo Marine 1 well produced flow rates of 8,520 barrels of oil per day. The well also tapped into a different geological structure from Nkossa, proving the existence of a separate field. The discovery was made within the Haute Mer exploration permit which could contain estimated oil reserves of 500 million barrels. Energy Africa holds a 4 percent interest in a consortium that includes Elf Aquitaine (51 percent), Chevron (30 percent), and Hydro Congo (15 percent). (DJ)
- February 11** Russia's RAO Gazprom and Italy's ENI SpA sign a preliminary agreement for joint exploration and exploitation of the Astrakhan region in Russia. The Astrakhan fields are estimated to contain up to one billion barrels of oil equivalent. The deal is worth \$3 billion and includes ENI taking a yet-to-be-determined stake in Gazprom. In addition, the two companies envision joint ventures in other regions of the world, including Europe, the Mediterranean, and China. (DJ)
- February 16** The United Nations (U.N.) Iraq Sanctions Committee approves a pricing plan for Iraqi oil to be shipped under the third phase of the U.N.-sponsored oil-for-food program. The approval clears the way for Iraq to export \$1.07 billion of oil in each of two 90-day periods. The first 90-day period ends on March 5, 1998. (DJ)

- February 17** A barge carrying about 200,000 gallons of diesel fuel sinks in rough seas off the coast of the United Arab Emirates. The barge is suspected of transporting smuggled fuel from Iraq. (DJ)
- February 18** United Nations (U.N.) Secretary-General Kofi Annan receives unanimous support from the U.N. Security Council for his diplomatic trip to Iraq. Annan is scheduled to meet with President Saddam Hussein and other Iraqi leaders in an attempt to reach a diplomatic solution to the standoff between Iraq and the U.N. over weapons inspections. (DJ)
- The international environmental group Greenpeace praises a policy decision by the European Union (EU) Commission to ban the disposal of offshore oil and gas platforms at sea. The Commission also called on countries in the OSPAR Convention to adopt the same policy. The OSPAR Convention regulates marine pollution in the North East Atlantic from Gibraltar to the Arctic. The policy, which carries an exemption for large concrete platforms, still requires approval from EU foreign ministers. The ministers will address the policy at a Ministerial meeting on July 20-24, 1998. (DJ)
- February 19** The U.S. Justice Department intervenes in four lawsuits against DuPont Company's Conoco Unit, Royal Dutch/Shell Group's Shell Oil Company, Burlington Resources, and Amoco Corporation. The companies are accused of violating the False Claims Act by knowingly underpaying royalties to the US government and Indian nations for oil extracted from public and Indian lands. No estimate of the value of the underpayments has been released, but a Justice Department attorney says that, since 1988, the companies had undervalued hundreds of millions of barrels of oil taken from the Gulf of Mexico and western states. (NYT) (WSJ)
- February 20** The United Nations (U.N.) Security Council votes unanimously to more than double the amount of oil Iraq can export under the U.N. oil-for-food program. The Security Council's vote increases the amount Iraq can export from \$2.14 billion to \$5.26 billion over six months. Iraq maintains that it only has the capability to export up to \$4 billion over a six-month period. (DJ)
- February 22** Sudan signs a \$600 million agreement with three foreign companies to construct a 994-mile pipeline to carry oil from the western fields of Higtig to Bashair Port, near Port Sudan on the Red Sea. The pipeline will transport 150,000 barrels per day and is expected to be operational by June 1999. The Sudanese government's partners are China's CPECC Oil Company, Argentina's Techint, and Britain's Weir and Allan Diesel (DJ)
- United Nations (U.N.) Secretary-General Kofi Annan reaches an agreement with senior Iraqi officials over U.N. inspections of suspected Iraqi weapons sites. The deal includes opening eight Iraqi presidential compounds to weapons inspectors, one of the major points of contention between Iraq and the U.N. Annan will now present the agreement to the U.N. Security Council for approval. (WP)
- February 23** Amerada Hess Corporation of the U.S. signs two production-sharing contracts with Malaysia's Petronas Carigali, marking Amerada Hess' entry into exploration activities in Malaysia. The contracts give Amerada Hess a 70 percent stake in block PM304 offshore Terengganu and an 80 percent stake in block SK306 offshore Sarawak. Amerada Hess has committed to spending \$24.9 million and drilling five well on the two blocks. (DJ)
- Japan's Export-Import Bank signs a loan agreement worth approximately \$80 million with Gas Authority of India Limited to help finance capacity expansion work on a natural gas pipeline linking Gujarat, Madhya, and Uttar provinces with the Bombay North oil and gas field. The loan is being co-financed by the Asian Development Bank. The loan will be used to boost the capacity of the pipeline from 636 million cubic feet per day to 1.2 billion cubic feet per day. (DJ)
- February 24** Turkmenistan and Shell Exploration B.V. sign a Memorandum of Understanding (MOU) providing Shell with the exclusive right to promote a project to transport Turkmen natural gas to Turkey. As part of the MOU, Shell will conduct a feasibility study on a proposed 1,200-mile gas pipeline connecting Turkmenistan and Turkey via Iranian territory. (DJ)
- February 26** State oil company Petroleos de Venezuela (PdVSA) announces that three major Venezuelan oil joint ventures will be delayed 6-8 months due to budget cuts. Lower-than-expected oil prices have forced PdVSA to cut its investment plan for 1998 by approximately \$1 billion. The three projects are the Cerro Negro joint venture with Mobil Corporation, the Total-led Sincor project in the Zulia region, and the Arco-led Petrolera Ameriven S.A. joint venture in the Maracaibo zone. All three are extra-heavy crude upgrading projects in the Orinoco Belt region in southeast Venezuela. (DJ)

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

¹/ Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1980 through July 1990 and beginning in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. In January 1998, Neutral Zone production by both Kuwait and Saudi Arabia totaled about 530 thousand barrels per day.

Notes: -OPEC=Organization of Petroleum Exporting Countries. -Monthly data are often preliminary and also may not average to the annual totals due to rounding.

^{1/} Other is a calculated total derived from the difference between "World" and the sum of production in "Total OPEC" (Table 1.1a) and all other countries listed (Tables 1.1b and 1.1c). The total "North Sea" is not subtracted from the world total, though Norway and the United Kingdom have been subtracted.

-- = Not applicable. R=Revised data. E=Estimated. FE=Preliminary estimate. RE=Revised estimate.

Notes: Monthly data are often preliminary and also may not average to the annual totals due to rounding. See Section 4 for historical series.

1/ Supply includes production of crude oil (including lease condensate), natural gas plant liquids, other hydrogen and hydrocarbons for refinery feedstocks, refinery gains, alcohol, and liquids produced from coal and other sources.

2/ U.S. geographical coverage is the 50 States and the District of Columbia. See Explanatory Note 1 in Appendix B.

3/ The term Demand is used interchangeably with the terms Consumption and Petroleum Products Supplied. See Appendix C for definition.

4/ Stock draws are positive numbers, stock additions are negative numbers.

5/ This is computed as Total Demand minus the sum of Total Supply and Total Reported Stock Draw.

NA = Not Available.

Notes: Sum of components may not equal total due to rounding.

1/ The data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

2/ "Other Europe" consists of Austria, Belgium, Denmark, Finland, Greece, Iceland, Ireland, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and Turkey.

3/ U.S. geographic coverage is the 50 States and District of Columbia.

4/ "Other" consists of Australia, New Zealand, and U. S. Territories.

5/ OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

6/ The Persian Gulf countries are all members of OPEC, except for Bahrain.

Notes: *Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. *OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group. *Negative numbers represent net exports.

*A dash (-) indicates no trade. *Zeros (.000) indicate net imports of less than 0.0005 million barrels per day. *See Section 4 for annual data.

Sources: See end of Section 3.

^{1/} U.S. geographic coverage is the 50 States and District of Columbia.

^{2/} "OECD Europe" consists of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

^{3/} The data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

Notes: *Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. *OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group. *"Persian Gulf" consists of Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates. *Negative numbers represent net exports. *A dash (-) indicates no trade. *Zeros (.000) indicate net imports of less than 0.0005 million barrels per day. *See Section 4 for annual data.

¹/ Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1970 through 1989 and beginning in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia.

P=Preliminary. R=Revised data.

Notes: *OPEC=Organization of Petroleum Exporting Countries.

^{1/} Other is a calculated total derived from the difference between "World" and the sum of production in "Total OPEC" (Table 1.1a) and all other countries listed (Tables 1.1b and 1.1c). The total "North Sea" is not subtracted from the world total, though Norway and the United Kingdom have been subtracted.

-- = Not applicable. P=Preliminary. R=Revised data.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1980 through July 1990 and beginning in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia.

P=Preliminary.

1/ Data through December 1990 are for the former West Germany. Beginning with January 1991, the data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

2/ "OECD Europe" consists of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

3/ U.S. geographic coverage is the 50 States and the District of Columbia. In the United States in January 1975, 1981, and 1983, numerous respondents were added to bulk terminal and pipeline surveys affecting subsequent stocks reported. Using the new basis, the end-of-year U.S. stocks, in million barrels, would have been 1,121 in 1974, 1,425 in 1980, and 1,461 in 1982.

4/ "Other" consists of Australia, New Zealand, and the U.S. Territories.

P-preliminary.

Note: Oil Stocks - See Explanatory Note 2 in Appendix B.

Sources: See end of Section 4.

^{1/} U.S. geographic coverage is the 50 States and District of Columbia.

^{2/} "OECD Europe" consists of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

^{3/} Data through 1990 are for the former West Germany.

Notes: *Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. *OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group. *"Persian Gulf" consists of Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates. *Negative numbers represent net exports. *A dash (-) indicates no trade. *Zeros (.000) indicate net imports of less than 0.0005 million barrels per day.

*Data for 1995 are preliminary.

Appendix A

Organizational and Geographical Definitions

Appendix A. Organizational and Geographical Definitions

International Energy Agency (IEA) countries are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States.

Organization for Economic Cooperation and Development (OECD) countries are: Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, South Korea, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States. Total OECD includes the United States Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). Total OECD excludes data for Czech Republic, Hungary, Mexico, Poland, and South Korea which are not yet available.

OECD Europe countries are: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom. OECD Europe excludes data for Czech Republic, Hungary, and Poland which are not yet available.

Organization of Petroleum Exporting Countries (OPEC) members are: Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela. As of December 31, 1992, Ecuador withdrew its membership in OPEC, and as of December 31, 1994, Gabon withdrew its membership. For consistency, Ecuador and Gabon are excluded in the historical series of OPEC totals.

Arab members of OPEC are: Algeria, Iraq, Kuwait, Libya, Qatar, Saudi Arabia and the United Arab Emirates.

Organization of Arab Petroleum Exporting Countries (OAPEC) are: Algeria, Bahrain, Egypt, Iraq, Kuwait, Libya, Neutral Zone, Qatar, Saudi Arabia, Syria, Tunisia, and the United Arab Emirates. In April 1979 Egypt was suspended from OAPEC membership. In May 1989 Egypt rejoined OAPEC. For consistency, Egypt is included in the historical series of the OAPEC totals.

Persian (Arabian) Gulf countries are: Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates.

The term "Former USSR" is being used in the International Petroleum Statistics Report as a purely geographical expression, referring to the Commonwealth of Independent States (CIS), Georgia, and the three Baltic States (Estonia, Latvia, and Lithuania).

Appendix B

Explanatory Notes

Appendix B. Explanatory Notes

Note 1: World Oil Supply

Supply includes production of crude oil (including lease condensate), natural gas plant liquids, other hydrogen and hydrocarbons for refinery feedstocks, refinery gain, alcohol, and liquids produced from coal and other sources. Beginning in 1993, U.S. data includes fuel ethanol blended into finished motor gasoline and oxygenate production from merchant MTBE plants.

Note 2: Oil Stocks

The International Energy Agency (IEA) assembles and reports total oil stock data for the member countries of the Organization for Economic Cooperation and Development (OECD). Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products. In its report titled Quarterly Oil Statistics and Energy Balances of OECD Countries, the IEA defines oil stocks as follows: "All non-military stocks held by importers (including all final consumers directly), refiners, Governments, major non-importing final consumers eligible under IEA/OECD commitments and by foreign entities in the following facilities: bulk terminals, refinery tanks, pipeline tankage, barges, intercoastal tankers (when port of departure and destination are in the reporting country), tankers in port (to the extent that their cargo is to be unloaded in the reporting country), and inland ship bunkers. Oil is reported regardless of the ownership of such storage facilities." IEA data exclude "oil held in pipelines, rail and truck tank cars, sea-going ships' bunkers, service stations, retail stores and tankers at sea." Also the IEA defines the United States to be the 50 States and the District of Columbia, and the U.S. Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). The Energy Information Administration (EIA) does not include the United States Territories in its statistical definition of the United States. Further, the EIA includes oil in oil pipelines as part of its stock data. Tables 1.5, 1.6, 2.3, and 4.4 include oil stocks for the United States according to EIA definitions. Using IEA definitions, at the end of September 1997 United States (including territories) oil stocks totaled 1,450 million barrels.

Note 3: A Change to the Oil Balance in Section 2.

Prior to August 1992, Section 2 of the International Petroleum Statistics Report presented a balance of oil supply, demand, and stock change for the Market Economies, at quarterly time intervals. The communist countries, or Centrally Planned Economies (CPEs) were not included in the balance, mainly because good quarterly data for oil demand in these countries were not available. Net imports from the CPEs were included in the balance as part of total Market Economies supply. At present, the former Soviet Union and most of the countries of Eastern Europe are in transition from communism to market economies; because of this there are no longer good political or economic reasons to publish an oil balance only for the countries that have traditionally been market economies. Beginning with the August 1992 edition, Section 2 of the International Petroleum Statistics Report was changed from a Market Economies oil balance to a world oil balance.

The main data issues related to this change may be summarized as follows:

Supply Data. Monthly oil supply data are available for all countries of the world. These data are used to generate Tables 1.1 to 1.4; they were used to expand the Section 2 supply table (Table 2.2) to the whole world.

Demand Data. EIA has now developed quarterly figures for world oil demand, including demand in the former CPEs; these are published in Table 4 of EIA's Short-Term Energy Outlook. The procedures involved in developing quarterly world demand numbers may be summarized as follows:

Complete monthly data are available for the 24 OECD countries. Annual demand data for all countries (about 200 countries) are presented in EIA's International Energy Annual. In 1993, the OECD accounted for about three-fifths of total world demand, the 25 largest consumers outside of the OECD accounted for about one-third of the world total, and the remaining countries (about 150 countries) accounted for less than one-tenth of the total. The key problem, therefore, is to develop good figures for the 25 largest consumers outside the OECD.

Of these 25 countries, by far the largest consumer is Russia, which in 1993 accounted for about one-sixth of the demand in the group of 25. The next largest consumer is China, which in 1993 accounted for about one-seventh of the demand in the group. Thus in 1993 Russia and China accounted for one-third of the demand in the group of 25. For these 2 countries, data are available on oil production and net exports. The demand numbers shown in Section 2 are computed as production minus net exports. This is the same procedure used in the EIA Short-Term Energy Outlook, by the International Energy Agency in their Monthly Oil Market Report, and in other respected publications that deal with international oil markets. Note, however, that this method of computing demand ignores both refinery gain and stock changes.

For other major consuming countries outside of the OECD, quarterly demand data are developed based upon the latest available annual data, analytic judgment about current trends, and some seasonal adjustments. These are the same procedures used for the Short-Term Energy Outlook.

Stocks Data. Reliable stocks data are available for the OECD countries. Estimates of stocks for export and afloat, and of commercial floating stocks, are available. (See sources at the end of Section 2.)

For on-land stocks outside the OECD, there is little reliable data. Most estimates of on-land stocks outside the OECD are based on the theory that stocks are approximately equal to some number of days of demand. Demand figures (which themselves involve some degree of estimation) are then used to compute estimates of stock levels.

In the International Petroleum Statistics Report, it had been the practice for some time to estimate that on-land stocks in the traditional market economies outside of the OECD were equal to 55 days of demand. This was acceptable, mainly because the rule was used only to estimate a relatively small part of total stocks (about 16 percent).

When Section 2 was converted from a Market Economies oil balance to a world oil balance, there were important changes in the conditions that made it reasonable to estimate on-land stocks outside of the OECD using the rule of 55 days of demand. When the CPEs are included, the stocks that must be estimated are a considerably larger part of the total. In 1990, total oil demand in the former CPEs was more than 80 percent as large as demand in all of the non-OECD traditional market economies. Thus the quantity of stocks that would have to be estimated using a 55-day rule would nearly double, and the estimated components of stock levels and stock changes would become relatively large parts of the total. One consequence of this is that the statistical discrepancy (as shown in Table 2.1) would become less useful as an indicator of the overall consistency of the data. The statistical discrepancy is computed from supply, demand, and stock change. If a large part of the stock change is estimated, then the statistical discrepancy loses much of its significance.

As already noted, quarterly demands in the former Soviet Union and in China are computed as production minus net exports. This computation implicitly assumes a zero stock change. Demand in the former Soviet Union is falling. If we were to use a 55-day rule to compute stock levels, falling demand would imply falling stock levels. This would contradict the assumption of zero stock change which was used in computing demand.

In view of all this, the following approach has been adopted. Table 2.3 now shows levels of stocks for the OECD countries, levels of stocks for export and afloat, and levels of commercial floating storage. Stock changes based on these stock levels are shown in Table 2.1. At this time, no other stock levels are shown. Table 2.1 now has a single line labelled "Other Stock Draw and Statistical Discrepancy", which contains the computed values needed to make the table balance.

It may become possible in the future to obtain reliable information on certain categories of on-land stocks outside the OECD. If such data become available, they will be added to Table 2.3, and the corresponding stock change information will be added to Table 2.1.

Changes in Formats and Sign Conventions. There were several changes in Section 2 to make the International Petroleum Statistics Report more consistent with other EIA publications, especially with the Short-Term Energy Outlook. The numbers were changed from 1 decimal place to 2 decimal places. The word "consumption", as used before August 1992, was changed to "demand". The sign convention for stock changes in Table 2.1 was changed. Stock draws are now indicated by positive numbers, and stock additions are indicated by negative numbers. Table 2.1 also uses a new sign convention for the line labelled "Other Stock Draw and Statistical Discrepancy". The values in this line are now computed as Total Demand minus the sum of Total Supply and Total Reported Stock Draw. This is the reverse of the sign convention used before August 1992.

Summary. Section 2 was expanded from a Market Economies oil balance to a world oil balance. Supply data are tracked for all producing countries. Demand data are tracked for the 24 OECD countries, and for 25 large consumers outside of the OECD. Demand for the remaining countries (less than 10 percent of total demand) is estimated, for years that are not yet available in the International Energy Annual. The stock levels in these tables are based on reported data for the OECD and for stocks at sea. The line in Table 2.1 labelled "Other Stock Draw and Statistical Discrepancy" is a balancing item.

Appendix C

Glossary

Appendix C. Glossary

Alcohol. The family name of a group of organic chemical compounds composed of carbon, hydrogen, and oxygen. The molecules in the series vary in chain length and are composed of a hydrocarbon plus a hydroxyl group. Alcohol includes methanol and ethanol.

Demand (Consumption/Petroleum Products Supplied). Total petroleum products supplied is the sum of all petroleum products supplied. For each product, the amount supplied is calculated by summing production, crude oil burned directly, imports, and net withdrawals from primary stocks and subtracting exports.

Crude Oil. A mixture of hydrocarbons that existed in liquid phase in underground reservoirs and remains liquid at atmospheric pressure after passing through surface-separating facilities. Crude oil production is measured at the wellhead and includes lease condensate.

Government-Owned Stocks. Oil stocks owned by the national government and held for national security. In the United States these stocks are known as the Strategic Petroleum Reserve.

Lease Condensate. A liquid recovered from natural gas at the well or at small gas/oil separators in the field. Consists primarily of pentanes and heavier hydrocarbons (also called field condensate).

Natural Gas Plant Liquids. Products obtained from processing natural gas at natural gas processing plants, including natural gasoline plants, cycling plants, and fractionators. Products obtained include ethane, liquefied petroleum gases, (propanes, butane, propane-butane mixtures, and ethane-propane mixtures), isopentane, natural gasoline, unfractionated streams, plant condensate, and other minor quantities of finished products, such as motor gasoline, special naphthas, jet fuel, kerosene, and distillate fuel oil.

Oil Stocks. Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products. See Explanatory Note 2.

Other Hydrocarbons. Other materials processed at refineries. Includes coal tar derivatives, hydrogen, gilsonite, and natural gas received by the refinery for reforming into hydrogen.

Oxygenates. Any substance which, when added to gasoline, increases the amount of oxygen in that gasoline blend. They include: Fuel Ethanol, Methanol, and MTBE (Methyl tertiary butyl ether).

Petroleum Products. Petroleum products are obtained from the processing of crude oil (including lease condensate), natural gas, and other hydrocarbon compounds. Petroleum products include unfinished oils, aviation gasoline, motor gasoline, naphtha-type jet fuel, kerosene-type jet fuel, kerosene, distillate fuel oil, residual fuel oil, ethane, liquefied petroleum gases, petrochemical feedstocks, special naphthas, lubricants, paraffin wax, petroleum coke, asphalt road oil, still gas, and other miscellaneous products.

Processing Gain. The amount by which the total volume of refinery output is greater than the volume of input for given period of time. The processing gain arises when crude oil and other hydrocarbons are processed into products that are, on average, less dense than the input.

Processing Loss. The amount by which the total volume of refinery output is less than the volume of input for given period of time. The processing loss arises when crude oil and other hydrocarbons are processed into products that are, on average, more dense than the input.

Appendix D

Estimation Procedures

Appendix D. Estimation Procedures

Estimation procedures are used for demand numbers in many of the countries outside of the OECD, in cases where data from EIA's International Energy Annual are not yet available. Demand numbers for 1995 and earlier years, for all countries, may be found in EIA's International Energy Annual 1995, published in December 1996, which is the most recent published edition of the International Energy Annual. EIA's WORLD ENERGY database contains final demand data for all countries of the world for 1994, and preliminary demand data for all countries for 1995. Instructions for downloading this database may be found on EIA's home page (<http://www.eia.doe.gov/emcu/world/contents.html>). The status of the demand numbers shown in Section 2 of this current International Petroleum Statistics Report may be summarized as follows.

The OECD demand numbers are, as usual, based on the latest Quarterly Oil Statistics and Monthly Oil Statistics tapes from the International Energy Agency.

For countries outside of the OECD, the following approach is used. The numbers for 1994 and earlier years match the demand numbers in the WORLD ENERGY database on EIA's home page. Numbers for 1995 forward are the best available EIA estimates, based upon the best annual data currently available, analytic judgment about current trends, and some seasonal adjustments. These are the same numbers that appear in the international oil balance table in EIA's Short-Term Energy Outlook.

The two largest non-OECD oil consumers are the former Soviet Union and China. For these two countries, published data are available on production and net exports. Demand is computed as production minus net exports. This is the same approach used in the Short-Term Energy Outlook, by the International Energy Agency in their Monthly Oil Market Report, and in other major publications dealing with international oil data. Note, however, that because of this computation, the demand numbers for the former Soviet Union and China implicitly exclude stock draw and refinery gain.

Appendix E

Conversions

Table E1. Refined Petroleum Products Conversion Factors

Product	Barrels per Metric Ton
Asphalt	6.06
Distillate Fuel Oil	7.46
Gasoline, Aviation	8.90
Gasoline, Motor	8.53
Greases	6.30
Jet Fuel, Kerosene-type	7.93
Jet Fuel, Naptha-type	8.27
Kerosene	7.73
Liquefied Petroleum Gas (LPG)	11.60
Lubricants	7.00
Miscellaneous Products	8.04
Naphthas	8.22
Natural Gas Liquids (NGL)	10.40
Natural Gasoline	10.00
Paraffin Oil	7.14
Paraffin Wax	7.87
Petrolatum	7.87
Petroleum Coke	5.51
Residual Fuel Oil	6.66
White Spirits	8.50
