HOW TO OBTAIN EIA PRODUCTS AND SERVICES

For further information on any of the following services, or for answers to energy information questions, please contact EIA's National Energy Information Center:

National Energy Information Center (NEIC)	(202) 586-8800
Energy Information Administration	(202) 586-0727 (fax)
Forrestal Building, Room 1F-048	TTY: (202) 586-1181
Washington, DC 20585	E-mail: infoctr@eia.doe.gov

Electronic Products and Services

EIA's Internet Site Services offer nearly all EIA publications. Users can view and download selected pages or entire reports, search for information, download EIA data and analysis applications, and find out about new EIA information products and services.

World Wide Web: <http://www.eia.doe.gov> Gopher: <gopher://gopher.eia.doe.gov> FTP: <ftp://ftp.eia.doe.gov>

EIA also offers a listserve service for EIA press releases and other short documents. Sign up on the EIA World Wide Web site.

EIA's CD-ROM, *Energy InfoDisc*, contains most EIA publications, several databases, and an energy forecasting model. The *Energy InfoDisc*, produced quarterly, is available for a fee from STAT-USA, Department of Commerce, 1-800-STAT-USA.

The Comprehensive Oil and Gas Information Source (COGIS), a bulletin board service, contains data files from most of EIA's oil- and gas-related reports. It is available for a fee from STAT-USA, on 1-800-STAT-USA.

EIA's Electronic Publishing System (EPUB) bulletin board contains data files, directories, and forecasts from most EIA reports. It can be accessed free of charge by dialing (202) 586-2557.

Many of EIA's data files and modeling programs are available for sale on diskette, tape, or cartridge, through either the National Technical Information Service or the Office of Scientific and Technical Information, Department of Energy. Contact NEIC for information on specific products, sources, and media, and ordering instructions.

Printed Publications

EIA directories are available free of charge from NEIC. Recent periodicals and one-time reports are available from the Government Printing Office. Older reports are available from the National Technical Information Service:

Superintendent of Documents	National Technical Information Service
U.S. Government Printing Office	U.S. Department of Commerce
P.O. Box 371954	Springfield, VA 22161
Pittsburgh, PA 15250-7954	5285 Port Royal Road
(202) 512-1800; (202) 512-2250 (fax)	(703) 487-4650; (703) 321-8547 (fax)

DISCLAIMER

Neither the United States Government nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or any agency thereof.

International Petroleum Statistics Report

December 1997

**Energy Information Administration
Office of Energy Markets and End Use
U.S. Department of Energy
Washington, DC 20585**

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the U.S. Department of Energy. The information contained herein should be attributed to the Energy Information Administration and should not be construed as advocating or reflecting any policy position of the Department of Energy or any other organization.

Preface

The International Petroleum Statistics Report is a monthly publication that provides current international oil data. This report is published for the use of Members of Congress, Federal agencies, State agencies, industry, and the general public. Publication of this report is in keeping with responsibilities given the Energy Information Administration in Public Law 95-91 (Section 205(a)(2)) that states:

"The Administrator shall be responsible for carrying out a central, comprehensive, and unified energy data and information program which will collect, evaluate, assemble, analyze and disseminate data and information ..."

The International Petroleum Statistics Report presents data on international oil production, demand, imports, and stocks. The report has four sections. Section 1 contains time series data on world oil production, and on oil demand and stocks in the Organization for Economic Cooperation and Development (OECD). This section contains annual data beginning in 1985, and monthly data for the most recent two years. Section 2 presents an oil supply/demand balance for the world. This balance is presented in quarterly intervals for the most recent two years. Section 3 presents data on oil imports by OECD countries. This section contains annual data for the most recent year, quarterly data for the most recent two quarters, and monthly data for the most recent twelve months. Section 4 presents annual time series data on world oil production and oil stocks, demand, and trade in OECD countries. World oil production and OECD demand data are for the years 1970 through 1996; OECD stocks from 1973 through 1996; and OECD trade from 1986 through 1996.

Data for the United States are developed by the Energy Information Administration's (EIA) Office of Oil and Gas. Data for other countries are derived largely from published sources, including International Energy Agency publications, the EIA International Energy Annual, and the trade press. (See sources after each section.) All data are reviewed by the International Statistics Branch of EIA. All data have been converted to units of measurement familiar to the American public. Definitions of oil production and consumption are consistent with other EIA publications.

General information about this publication may be obtained from W. Calvin Kilgore, Director, Office of Energy Markets and End Use, (202) 586-1617, and from Louis D. DeMoury, Director, Integrated Energy Statistics Division, (202) 586-6557. Detailed questions and comments concerning the contents of the International Petroleum Statistics Report may be directed to Michael J. Grillot, Team Leader, International Energy Statistics Team, (202) 586-6577; Patricia A. Smith (202) 586-6925, or to H. Vicky McLaine (202) 586-9412; Oil Market Chronology - Douglas MacIntyre (202) 586-1831.

Notes: As of December 31, 1994, Gabon withdrew its membership in the Organization of Petroleum Exporting Countries (OPEC). For consistency, Gabon is excluded in the historical series of OPEC totals.

Oil Market Chronology -- November 1997

The following chronology lists international events of potential significance for world petroleum markets. Sources include: Dow Jones (DJ), the New York Times (NYT), the Washington Post (WP), and the Wall Street Journal (WSJ).

- November 3** An official from Russian oil drilling company Zarubezhneft denies an Iraqi news report that it will begin developing Iraq's 600,000-barrel-per-day West Qurna oil field. Zarubezhneft is part of a consortium led by Russia's Lukoil that signed a 23-year production sharing agreement with Iraq, valued at \$3.8 billion, to develop the field. Zarubezhneft's Deputy General Director Yuri Agababov indicates that there have been negotiations but reiterates that work in Iraq will not start until United Nations sanctions are lifted. (DJ)
- Dutch and Belgian oil worker unions call for a boycott of Nigerian crude oil as part of a campaign to secure the release of jailed Nigerian oil union leaders Milton Dabibi and Frank Korkori. (DJ)
- November 4** The U.S. Department of the Interior rejects a petition from environmental groups seeking to halt crude oil and natural gas drilling in the Beaufort Sea off the coast of Alaska's Arctic National Wildlife Refuge. The petition expressed concern for potential damage to the ecosystem of the refuge from pollution and possible oil spills. However, the Interior Department states that Atlantic Richfield Company's plan for exploration in the Beaufort Sea has adequate safeguards to protect the area. (DJ)
- Turkmenistan withdraws three of eleven blocks from the first round of an offshore oil and gas tender opened on September 1, 1997. The three blocks, Lachin, Burgut, and Yelbars, lie on the Turkmen-Iranian Caspian Sea border-zone, calling ownership into question. The three blocks contain estimated reserves of 17.1 trillion cubic feet of natural gas and 5.4 billion barrels of oil. (DJ)
- November 5** Texaco North Sea U.K. Limited announces that natural gas and condensate production has begun in its United Kingdom North Sea Erskine field. This follows a November 3, 1997 announcement that first production had been delayed again from the original start-up date of October 14, 1997 due to final testing on a pipeline that will carry gas and condensate to a London platform operated by Amoco Exploration Company. Peak production is expected to reach 120 million cubic feet of gas per day and 29,600 barrels per day of condensate by October 1998. Estimated recoverable reserves total more than 330 billion cubic feet of natural gas and over 75 million barrels of condensate. (DJ)
- Turkmenistan resumes natural gas shipments to Ukraine following the signing of a new agreement on paying for the fuel. Under the agreement, Turkmenistan will supply 99 billion cubic feet of gas through the end of 1997 and 706 billion cubic feet in 1998. Ukraine is required to pay for at least half of the shipments in cash and the remainder through barter and other mechanisms. Turkmenistan cut off gas shipments to Ukraine in April 1997 to force repayment of a \$300 million debt from previous gas shipments. (DJ)
- November 7** Mexico's state-owned Petroleos Mexicanos announces that it will spend \$3.5 billion over the next three years to build coker units at three oil refineries in Salina Cruz, Ciudad Madero, and Minatitlan. The project will begin in 1998 and enable the refineries to produce more high quality products, such as diesel fuel and gasoline, from heavy Mexican crude oil. The upgrade is designed to meet rising domestic demand for oil, but should also permit increased exports. (DJ)
- November 8** Azerbaijan's parliament ratifies an exploration agreement signed between Azerbaijan's state oil company and Mobil Corporation on August 1, 1997. The \$2 billion deal is for the exploration of the Oguz oil field located about 50 miles southeast of the Apscheron Peninsula in the Caspian Sea. Each company holds a 50 percent stake in the project, and reserves are estimated at 733 million barrels of oil. (DJ)

- November 11** Russian President Boris Yeltsin and Chinese President Jiang Zemin sign an agreement to build a \$12 billion pipeline to carry natural gas from eastern Siberia to China and then on to Japan and South Korea. The pipeline is expected to bring 353 billion cubic feet of gas to China and make available an additional 353 billion cubic feet to Japan and South Korea over a 30-year period. South Korea and Japan have yet to sign off on the deal, but the two countries are expected to provide equipment and financing. (WSJ)
- Russian gas company Gazprom postpones a bond offering to raise up to \$3 billion for a natural gas exploration project in Iran. Gazprom cites uncertain market conditions as the reason for the delay. The lead underwriter for Gazprom is Goldman, Sachs, an American investment bank, which may be in violation of the 1996 Iran-Libya Sanctions Act for its role in the bond offering. Gazprom and its partners, France's Total and Malaysian oil company Petronas, signed a \$2 billion contract last month with Iran to begin exploration of Iran's South Pars gas field. (NYT)
- November 12** BG Exploration and Production and its partners Royal Dutch/Shell Group and Edison International sign a natural gas sales agreement with Egyptian General Petroleum Company to supply gas from the Rosetta Concession, offshore Egypt's Nile Delta. Gas deliveries will begin in January 2000 and reach a maximum of 250 million cubic feet of gas per day. The agreement is scheduled to last for a minimum of 20 years. (DJ)
- The United Nations (U.N.) Security Council unanimously approves a resolution to condemn Iraq for its decision to expel Americans from U.N. weapons inspection teams. The Council's measure imposes a travel ban on Iraqi officials who obstruct the inspection teams and expresses the firm intention to take further unspecified measures if Iraq continues to defy the U.N. (DJ)
- November 13** Australian crude oil and natural gas producer, Santos Limited, reports that it has made one of the largest natural gas discoveries in Australia at its Barroolka field in southwest Queensland state. Barroolka's reserves are estimated at 575 billion cubic feet. Santos holds a 58.86 percent interest in the field. (DJ)
- November 14** Coastal Corporation signs a memorandum of understanding with Maraven, a unit of Venezuela's state-owned Petroleos de Venezuela, for a 35-year joint venture to produce, refine, and market extra heavy crude oil from the Zuata region of Venezuela's Orinoco Belt. The crude oil will be transported via pipeline to the Jose upgrading complex near Puerto La Cruz and then on to Coastal's 100,000-barrel-per-day refinery in Corpus Christi, Texas. The agreement calls for the joint venture to purchase the Corpus Christi refinery and install a new delayed coking unit and an additional hydrotreatment unit. The deal is still subject to final approval by the Venezuelan Congress and by Coastal's board. (DJ)
- November 17** Royal Dutch/Shell announces that it will invest \$1 billion in a joint venture with Russia's Gazprom to produce crude oil, natural gas liquids, and natural gas in Russia and elsewhere. Shell and Gazprom will share equal ownership in the partnership. In a separate memorandum of understanding, Shell, Gazprom, and Russian oil company, Lukoil, announce that they will submit a joint bid for a stake in Russian oil company, Rosneft, when it becomes available for privatization in the near future. (NYT)
- November 18** Mobil Oil Qatar, a unit of Mobil Corporation, signs a memorandum of understanding with state-owned Qatar General Petroleum Corporation to evaluate development of Qatar's North Field. The giant field contains estimated reserves of more than 380 trillion cubic feet of natural gas and is thought to be the world's largest nonassociated natural gas field. Mobil says the project will eventually deliver one billion cubic feet of natural gas per day, primarily to the Qatari domestic market, more than 30,000 barrels per day of condensate, and more than 15,000 barrels per day of propane and butane. (WSJ)
- Kazakhstan signs an agreement with a consortium that includes US-based Texaco, British Gas, Italy's Agip, and Russia's Lukoil to develop the Karachaganak crude oil and natural gas field in northwestern Kazakhstan. The field's reserves are estimated at more than 2 billion barrels of crude oil and condensate and about 20 trillion cubic feet of natural gas. The consortium will develop the field for the next 40 years, with Agip and British Gas each holding a 32.5 percent interest in the field, Texaco 20 percent and Lukoil 15 percent. (DJ)

- November 18** Kazakhstan signs an agreement with a consortium that includes Mobil Corporation, British Petroleum, Royal Dutch/Shell, Norway's Statoil, France's Total, British Gas, and Italy's Agip to explore an offshore area in the North Caspian Sea known as Kazakhstancaspishelf. The agreement allows the consortium to split production from 12 blocks selected by the consortium and also calls for additional seismic data. Drilling is expected to start in 1998. (DJ)
- Nizar Hamdoun, Iraq's United Nations (U.N.) representative, announces that Iraq will not continue the U.N.-sponsored oil-for-food sale unless the U.N. agrees to a specific date for lifting economic sanctions. Hamdoun indicates that Iraq will continue to participate in the current six-month phase of the oil-for-food sale, which runs through December 4, 1997. (DJ)
- November 20** Iraq's Revolution Command Council formally endorses an agreement, arranged by Russia, that enables United Nations (U.N.) weapons inspection teams to resume operations in Iraq. The deal ends a three-week standoff between the U.N. and Iraq that began in late October 1997 after Iraq announced it would no longer allow U.S. citizens to serve on U.N. weapons' inspection teams. (DJ)
- Egypt and Libya sign an agreement to link the two countries' natural gas networks by constructing a pipeline between Tobruq, Libya and Alexandria, Egypt. The two countries also have agreed to form a joint company to manufacture pipelines and integrate their petrochemical industries. (DJ)
- November 21** Turkey's state-run petroleum company Turkiye Petrolleri Anonim Ortakligi will team with Amoco Corporation to explore and develop the Alibegamolla oil fields in Kazakhstan. The two companies plan to invest \$850 million in the oil fields, located in the Temir region. (DJ)
- Exxon Services Venezuela, a unit of Exxon Corporation, agrees to form a joint venture with Corpoven, a unit of Venezuela's state-owned oil company Petroleos de Venezuela. The joint venture will develop extra heavy crude oil from the Hamaca area of the Orinoco belt. Although the project still requires the approval of Venezuela's Congress, Exxon indicates that its initial investment will be \$800 million, and Corpoven foresees the companies investing \$4.9 billion over 35 years. Exxon will hold a 70 percent interest in the venture and Corpoven the remaining 30 percent. (WSJ)
- November 25** Canada's AEC Pipelines initiates an expansion of its Alberta Oil Sands Pipeline to accommodate extra output from the Syncrude Canada plant. The initial phase of the project involves a 30-inch looping of the existing 22-inch system and will increase pipeline capacity to 300,000 barrels per day. This phase is estimated to cost about \$155 million and is expected to be completed as early as 1999. AEC also reports that when the pipeline expansion is fully complete, the system will carry up to 950,000 barrels of crude oil per day from Ft. McMurray to Edmonton. (DJ)
- U.S. oil company Chevron Corporation and representatives from Australia's Aborigines finalize a land access agreement for a proposed \$2 billion, 1,553-mile natural gas pipeline between Papua New Guinea and Australia's Queensland state. The agreement is a significant step toward final approval of the project, that is scheduled for October 1998. (DJ)
- November 26** Mexico's state-owned oil company Petroleos Mexicanos signs a \$2.46 billion contract with a consortium consisting of South Korea's Sunkong Engineering and Construction, Germany's Siemens, and Mexico's Tribasa to expand and modernize an oil refinery in northeastern Mexico. The project involves the construction of nine new units, the expansion and updating of ten existing units, and the construction of 754 miles of oil pipeline. Construction is expected to be complete within three years. (DJ)
- November 28** United Nations Secretary-General Kofi Annan decides not to give a recommendation on the amount of oil Iraq can sell in the next six month phase of the oil-for-food program. The current six month phase ends December 4, 1997. Annan will suggest improvements to the program, but will not specify a recommended amount of oil that Iraq will be allowed to export. Currently, Iraq is allowed to export \$1.07 billion worth of oil every 90 days for two consecutive 90-day periods. (WP)

November 29 For the first time in four years, the Organization of Petroleum Exporting Countries (OPEC) agrees to an increase in its production ceiling. OPEC has raised the ceiling to 27.5 million barrels per day for the first half of 1998, effective January 1, 1998. The new ceiling represents a 10 percent increase over the current ceiling. The new quotas are as follows: Saudi Arabia 8.76 million barrels per day (bbl/d), Iran 3.942 million bbl/d, Iraq 1.314 million bbl/d, Venezuela 2.583 million bbl/d, Nigeria 2.042 million bbl/d, Indonesia 1.456 million bbl/d, Kuwait 2.19 million bbl/d, Libya 1.522 million bbl/d, United Arab Emirates 2.366 million bbl/d, Algeria 0.909 million bbl/d, and Qatar 0.414 million bbl/d. ^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1980 through July 1990 and beginning in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. In October 1997, Neutral Zone production by both Kuwait and Saudi Arabia totaled about 530 thousand barrels per day.

Notes: -OPEC=Organization of Petroleum Exporting Countries. -Monthly data are often preliminary and also may not average to the annual totals due to rounding.

Sources: See end of Section 1.

^{1/} Other is a calculated total derived from the difference between "World" and the sum of production in "Total OPEC" (Table 1.1a) and all other countries listed (Tables 1.1b and 1.1c). The total "North Sea" is not subtracted from the world total, though Norway and the United Kingdom have been subtracted.

-- = Not applicable. R=Revised data. E=Estimated. PE=Preliminary estimate. RE=Revised estimate.

Notes: -Monthly data are often preliminary and also may not average to the annual totals due to rounding. See Section 4 for historical series.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1980 through July 1990 and beginning in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. In October 1997, Neutral Zone production by both Kuwait and Saudi Arabia totaled about 530 thousand barrels per day.

Notes: *OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

*Monthly data are often preliminary and also may not average to the annual totals due to rounding.

Sources: See end of Section 1.

1/ Through December 1990, the data for Germany are for the former West Germany only. Beginning with January 1991, the data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

2/ "OECD Europe" consists of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

3/ U.S. geographic coverage is the 50 States and the District of Columbia.

4/ "Other" consists of Australia, New Zealand, and the U.S. Territories.

R=Revised data.

Notes: *The term Demand is used interchangeably with Consumption and Petroleum Products Supplied. See Appendix C for definition. *See Section 4 for historical series.

Sources: See end of Section 1.

Sources for Section 1 (Annual and Monthly Oil Data)

Crude Oil Production, Natural Gas Liquids Production, Other Liquids, and Refinery Gain

United States: Energy Information Administration (EIA), Petroleum Supply Annual 1996 and Petroleum Supply Monthly, November 1997.

Other Countries: Annual data -- EIA, International Energy Annual, various issues. Monthly data -- Canada -- Maclean Hunter Publishing Company, Oilweek, various issues. Denmark, Mexico, Netherlands, Norway, Germany, and all OPEC countries -- Petroleum and Energy Intelligence Weekly, Inc., Petroleum Intelligence Weekly, various issues. All Other Countries -- PennWell Publishing Company, Oil and Gas Journal, various issues. Refinery Gains: National Petroleum Council, U.S. Petroleum Refinery Study, October 1986.

Oil Stocks

United States: EIA, Petroleum Supply Annual 1996 and Petroleum Supply Monthly, November 1997.

Other OECD Countries: • Organization for Economic Cooperation and Development (OECD), Quarterly Oil Statistics and Energy Balances, various issues. • OECD, Monthly Oil Statistics data base, 1985-1997.

Oil Demand

United States: EIA, Petroleum Supply Annual 1996 and Petroleum Supply Monthly, November 1997.

Other OECD Countries: • OECD, Quarterly Oil Statistics and Energy Balances, various issues. • OECD, Monthly Oil Statistics data base, 1985-1997.

1/ Supply includes production of crude oil (including lease condensate), natural gas plant liquids, other hydrogen and hydrocarbons for refinery feedstocks, refinery gains, alcohol, and liquids produced from coal and other sources.

2/ U.S. geographical coverage is the 50 States and the District of Columbia. See Explanatory Note 1 in Appendix B.

3/ The term Demand is used interchangeably with the terms Consumption and Petroleum Products Supplied. See Appendix C for definition.

4/ Stock draws are positive numbers, stock additions are negative numbers.

5/ This is computed as Total Demand minus the sum of Total Supply and Total Reported Stock Draw.

NA = Not Available.

Note: Sum of components may not equal total due to rounding.

1/ The data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

2/ "Other Europe" consists of Austria, Belgium, Denmark, Finland, Greece, Iceland, Ireland, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and Turkey.

3/ U.S. geographic coverage is the 50 States and District of Columbia.

4/ "Other" consists of Australia, New Zealand, and U. S. Territories.

5/ OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

6/ The Persian Gulf countries are all members of OPEC, except for Bahrain.

Notes: *Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. *OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group. *Negative numbers represent net exports.

*A dash (-) indicates no trade. *Zeros (.000) indicate net imports of less than 0.0005 million barrels per day. *See Section 4 for annual data.

Sources: See end of Section 3.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1970 through 1989 and beginning in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia.

P= Preliminary.

Notes: *OPEC=Organization of Petroleum Exporting Countries.

^{1/} Other is a calculated total derived from the difference between "World" and the sum of production in "Total OPEC" (Table 1.1a) and all other countries listed (Tables 1.1b and 1.1c). The total "North Sea" is not subtracted from the world total, though Norway and the United Kingdom have been subtracted.

-- = Not applicable. P=Preliminary.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1980 through July 1990 and beginning in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia.

1/ Data through December 1990 are for the former West Germany. Beginning with January 1991, the data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

2/ "OECD Europe" consists of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

3/ U.S. geographic coverage is the 50 States and the District of Columbia. In the United States in January 1973, 1981, and 1983, numerous respondents were added to bulk terminal and pipeline surveys affecting subsequent stocks reported. Using the new basis, the end-of-year U.S. stocks, in million barrels, would have been 1,121 in 1974, 1,425 in 1980, and 1,461 in 1982.

4/ "Other" consists of Australia, New Zealand, and the U.S. Territories.

P=Preliminary.

Note: Oil Stocks - See Explanatory Note 2 in Appendix B.

Sources: See end of Section 4.

^{1/} Data through 1990 are for the former West Germany. Beginning with January 1991, the data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

^{2/} "OECD Europe" consists of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

^{3/} U.S. geographic coverage is the 50 States and the District of Columbia.

^{4/} "Other" consists of Australia, New Zealand, and the U.S. Territories.

P=Preliminary. --=Not Applicable.

Note: The term Demand is used interchangeably with Consumption and Petroleum Products Supplied. See Appendix C for definition.

Sources: See end of Section 4.

Appendix A

Organizational and Geographical Definitions

Appendix A. Organizational and Geographical Definitions

International Energy Agency (IEA) countries are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States.

Organization for Economic Cooperation and Development (OECD) countries are: Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, South Korea, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States. Total OECD includes the United States Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). Total OECD excludes data for Czech Republic, Hungary, Mexico, Poland, and South Korea which are not yet available.

OECD Europe countries are: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom. OECD Europe excludes data for Czech Republic, Hungary, and Poland which are not yet available.

Organization of Petroleum Exporting Countries (OPEC) members are: Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela. As of December 31, 1992, Ecuador withdrew its membership in OPEC, and as of December 31, 1994, Gabon withdrew its membership. For consistency, Ecuador and Gabon are excluded in the historical series of OPEC totals.

Arab members of OPEC are: Algeria, Iraq, Kuwait, Libya, Qatar, Saudi Arabia and the United Arab Emirates.

Organization of Arab Petroleum Exporting Countries (OAPEC) are: Algeria, Bahrain, Egypt, Iraq, Kuwait, Libya, Neutral Zone, Qatar, Saudi Arabia, Syria, Tunisia, and the United Arab Emirates. In April 1979 Egypt was suspended from OAPEC membership. In May 1989 Egypt rejoined OAPEC. For consistency, Egypt is included in the historical series of the OAPEC totals.

Persian (Arabian) Gulf countries are: Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates.

The term "Former USSR" is being used in the International Petroleum Statistics Report as a purely geographical expression, referring to the Commonwealth of Independent States (CIS), Georgia, and the three Baltic States (Estonia, Latvia, and Lithuania).

Appendix B

Explanatory Notes

Appendix B. Explanatory Notes

Note 1: World Oil Supply

Supply includes production of crude oil (including lease condensate), natural gas plant liquids, other hydrogen and hydrocarbons for refinery feedstocks, refinery gain, alcohol, and liquids produced from coal and other sources. Beginning in 1993, U.S. data includes fuel ethanol blended into finished motor gasoline and oxygenate production from merchant MTBE plants.

Note 2: Oil Stocks

The International Energy Agency (IEA) assembles and reports total oil stock data for the member countries of the Organization for Economic Cooperation and Development (OECD). Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products. In its report titled Quarterly Oil Statistics and Energy Balances of OECD Countries, the IEA defines oil stocks as follows: "All non-military stocks held by importers (including all final consumers directly), refiners, Governments, major non-importing final consumers eligible under IEA/OECD commitments and by foreign entities in the following facilities: bulk terminals, refinery tanks, pipeline tankage, barges, intercoastal tankers (when port of departure and destination are in the reporting country), tankers in port (to the extent that their cargo is to be unloaded in the reporting country), and inland ship bunkers. Oil is reported regardless of the ownership of such storage facilities." IEA data exclude "oil held in pipelines, rail and truck tank cars, sea-going ships' bunkers, service stations, retail stores and tankers at sea." Also the IEA defines the United States to be the 50 States and the District of Columbia, and the U.S. Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). The Energy Information Administration (EIA) does not include the United States Territories in its statistical definition of the United States. Further, the EIA includes oil in oil pipelines as part of its stock data. Tables 1.5, 1.6, 2.3, and 4.4 include oil stocks for the United States according to EIA definitions. Using IEA definitions, at the end of June 1997 United States (including territories) oil stocks totaled 1,430 million barrels.

Note 3: A Change to the Oil Balance in Section 2

Prior to August 1992, Section 2 of the International Petroleum Statistics Report presented a balance of oil supply, demand, and stock change for the Market Economies, at quarterly time intervals. The communist countries, or Centrally Planned Economies (CPEs) were not included in the balance, mainly because good quarterly data for oil demand in these countries were not available. Net imports from the CPEs were included in the balance as part of total Market Economies supply. At present, the former Soviet Union and most of the countries of Eastern Europe are in transition from communism to market economies; because of this there are no longer good political or economic reasons to publish an oil balance only for the countries that have traditionally been market economies. Beginning with the August 1992 edition, Section 2 of the International Petroleum Statistics Report was changed from a Market Economies oil balance to a world oil balance.

The main data issues related to this change may be summarized as follows:

Supply Data. Monthly oil supply data are available for all countries of the world. These data are used to generate Tables 1.1 to 1.4; they were used to expand the Section 2 supply table (Table 2.2) to the whole world.

Demand Data. EIA has now developed quarterly figures for world oil demand, including demand in the former CPEs; these are published in Table 4 of EIA's Short-Term Energy Outlook. The procedures involved in developing quarterly world demand numbers may be summarized as follows:

Complete monthly data are available for the 24 OECD countries. Annual demand data for all countries (about 200 countries) are presented in EIA's International Energy Annual. In 1993, the OECD accounted for about three-fifths of total world demand, the 25 largest consumers outside of the OECD accounted for about one-third of the world total, and the remaining countries (about 150 countries) accounted for less than one-tenth of the total. The key problem, therefore, is to develop good figures for the 25 largest consumers outside the OECD.

Of these 25 countries, by far the largest consumer is Russia, which in 1993 accounted for about one-sixth of the demand in the group of 25. The next largest consumer is China, which in 1993 accounted for about one-seventh of the demand in the group. Thus in 1993 Russia and China accounted for one-third of the demand in the group of 25. For these 2 countries, data are available on oil production and net exports. The demand numbers shown in Section 2 are computed as production minus net exports. This is the same procedure used in the EIA Short-Term Energy Outlook, by the International Energy Agency in their Monthly Oil Market Report, and in other respected publications that deal with international oil markets. Note, however, that this method of computing demand ignores both refinery gain and stock changes.

For other major consuming countries outside of the OECD, quarterly demand data are developed based upon the latest available annual data, analytic judgment about current trends, and some seasonal adjustments. These are the same procedures used for the Short-Term Energy Outlook.

Stocks Data. Reliable stocks data are available for the OECD countries. Estimates of stocks for export and afloat, and of commercial floating stocks, are available. (See sources at the end of Section 2.)

For on-land stocks outside the OECD, there is little reliable data. Most estimates of on-land stocks outside the OECD are based on the theory that stocks are approximately equal to some number of days of demand. Demand figures (which themselves involve some degree of estimation) are then used to compute estimates of stock levels.

In the International Petroleum Statistics Report, it had been the practice for some time to estimate that on-land stocks in the traditional market economies outside of the OECD were equal to 55 days of demand. This was acceptable, mainly because the rule was used only to estimate a relatively small part of total stocks (about 16 percent).

When Section 2 was converted from a Market Economies oil balance to a world oil balance, there were important changes in the conditions that made it reasonable to estimate on-land stocks outside of the OECD using the rule of 55 days of demand. When the CPEs are included, the stocks that must be estimated are a considerably larger part of the total. In 1990, total oil demand in the former CPEs was more than 80 percent as large as demand in all of the non-OECD traditional market economies. Thus the quantity of stocks that would have to be estimated using a 55-day rule would nearly double, and the estimated components of stock levels and stock changes would become relatively large parts of the total. One consequence of this is that the statistical discrepancy (as shown in Table 2.1) would become less useful as an indicator of the overall consistency of the data. The statistical discrepancy is computed from supply, demand, and stock change. If a large part of the stock change is estimated, then the statistical discrepancy loses much of its significance.

As already noted, quarterly demands in the former Soviet Union and in China are computed as production minus net exports. This computation implicitly assumes a zero stock change. Demand in the former Soviet Union is falling. If we were to use a 55-day rule to compute stock levels, falling demand would imply falling stock levels. This would contradict the assumption of zero stock change which was used in computing demand.

In view of all this, the following approach has been adopted. Table 2.3 now shows levels of stocks for the OECD countries, levels of stocks for export and afloat, and levels of commercial floating storage. Stock changes based on these stock levels are shown in Table 2.1. At this time, no other stock levels are shown. Table 2.1 now has a single line labelled "Other Stock Draw and Statistical Discrepancy", which contains the computed values needed to make the table balance.

It may become possible in the future to obtain reliable information on certain categories of on-land stocks outside the OECD. If such data become available, they will be added to Table 2.3, and the corresponding stock change information will be added to Table 2.1.

Changes in Formats and Sign Conventions. There were several changes in Section 2 to make the International Petroleum Statistics Report more consistent with other EIA publications, especially with the Short-Term Energy Outlook. The numbers were changed from 1 decimal place to 2 decimal places. The word "consumption", as used before August 1992, was changed to "demand". The sign convention for stock changes in Table 2.1 was changed. Stock draws are now indicated by positive numbers, and stock additions are indicated by negative numbers. Table 2.1 also uses a new sign convention for the line labelled "Other Stock Draw and Statistical Discrepancy". The values in this line are now computed as Total Demand minus the sum of Total Supply and Total Reported Stock Draw. This is the reverse of the sign convention used before August 1992.

Summary. Section 2 was expanded from a Market Economies oil balance to a world oil balance. Supply data are tracked for all producing countries. Demand data are tracked for the 24 OECD countries, and for 25 large consumers outside of the OECD. Demand for the remaining countries (less than 10 percent of total demand) is estimated, for years that are not yet available in the International Energy Annual. The stock levels in these tables are based on reported data for the OECD and for stocks at sea. The line in Table 2.1 labelled "Other Stock Draw and Statistical Discrepancy" is a balancing item.

Appendix C

Glossary

Appendix C. Glossary

Alcohol. The family name of a group of organic chemical compounds composed of carbon, hydrogen, and oxygen. The molecules in the series vary in chain length and are composed of a hydrocarbon plus a hydroxyl group. Alcohol includes methanol and ethanol.

Demand (Consumption/Petroleum Products Supplied). Total petroleum products supplied is the sum of all petroleum products supplied. For each product, the amount supplied is calculated by summing production, crude oil burned directly, imports, and net withdrawals from primary stocks and subtracting exports.

Crude Oil. A mixture of hydrocarbons that existed in liquid phase in underground reservoirs and remains liquid at atmospheric pressure after passing through surface-separating facilities. Crude oil production is measured at the wellhead and includes lease condensate.

Government-Owned Stocks. Oil stocks owned by the national government and held for national security. In the United States these stocks are known as the Strategic Petroleum Reserve.

Lease Condensate. A liquid recovered from natural gas at the well or at small gas/oil separators in the field. Consists primarily of pentanes and heavier hydrocarbons (also called field condensate).

Natural Gas Plant Liquids. Products obtained from processing natural gas at natural gas processing plants, including natural gasoline plants, cycling plants, and fractionators. Products obtained include ethane, liquefied petroleum gases, (propanes, butane, propane-butane mixtures, and ethane-propane mixtures), isopentane, natural gasoline, unfractionated streams, plant condensate, and other minor quantities of finished products, such as motor gasoline, special naphthas, jet fuel, kerosene, and distillate fuel oil.

Oil Stocks. Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products. See Explanatory Note 2.

Other Hydrocarbons. Other materials processed at refineries. Includes coal tar derivatives, hydrogen, gilsonite, and natural gas received by the refinery for reforming into hydrogen.

Oxygenates. Any substance which, when added to gasoline, increases the amount of oxygen in that gasoline blend. They include: Fuel Ethanol, Methanol, and MTBE (Methyl tertiary butyl ether).

Petroleum Products. Petroleum products are obtained from the processing of crude oil (including lease condensate), natural gas, and other hydrocarbon compounds. Petroleum products include unfinished oils, aviation gasoline, motor gasoline, naphtha-type jet fuel, kerosene-type jet fuel, kerosene, distillate fuel oil, residual fuel oil, ethane, liquefied petroleum gases, petrochemical feedstocks, special naphthas, lubricants, paraffin wax, petroleum coke, asphalt road oil, still gas, and other miscellaneous products.

Processing Gain. The amount by which the total volume of refinery output is greater than the volume of input for given period of time. The processing gain arises when crude oil and other hydrocarbons are processed into products that are, on average, less dense than the input.

Processing Loss. The amount by which the total volume of refinery output is less than the volume of input for given period of time. The processing loss arises when crude oil and other hydrocarbons are processed into products that are, on average, more dense than the input.

Appendix D

Estimation Procedures

Appendix D. Estimation Procedures

Estimation procedures are used for demand numbers in many of the countries outside of the OECD, in cases where data from EIA's International Energy Annual are not yet available. Demand numbers for 1995 and earlier years, for all countries, may be found in EIA's International Energy Annual 1995, published in December 1996, which is the most recent published edition of the International Energy Annual. EIA's WORLD ENERGY database contains final demand data for all countries of the world for 1994, and preliminary demand data for all countries for 1995. Instructions for downloading this database may be found on EIA's home page (<http://www.eia.doe.gov/emeu/world/contents.html>). The status of the demand numbers shown in Section 2 of this current International Petroleum Statistics Report may be summarized as follows.

The OECD demand numbers are, as usual, based on the latest Quarterly Oil Statistics and Monthly Oil Statistics tapes from the International Energy Agency.

For countries outside of the OECD, the following approach is used. The numbers for 1994 and earlier years match the demand numbers in the WORLD ENERGY database on EIA's home page. Numbers for 1995 forward are the best available EIA estimates, based upon the best annual data currently available, analytic judgment about current trends, and some seasonal adjustments. These are the same numbers that appear in the international oil balance table in EIA's Short-Term Energy Outlook.

The two largest non-OECD oil consumers are the former Soviet Union and China. For these two countries, published data are available on production and net exports. Demand is computed as production minus net exports. This is the same approach used in the Short-Term Energy Outlook, by the International Energy Agency in their Monthly Oil Market Report, and in other major publications dealing with international oil data. Note, however, that because of this computation, the demand numbers for the former Soviet Union and China implicitly exclude stock draw and refinery gain.
