DISCLAIMER

This report was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or any agency thereof.

This directory (NUREG/BR-0088, Revision 7) lists local public document rooms (LPDRs) for commercial nuclear power plants with operating or possession-only licenses or under construction, plus the LPDRs for potential high-level radioactive waste repository sites, gaseous diffusion plants, certain fuel cycle facilities, certain low-level waste disposal facilities, and any temporary LPDRs established for the duration of licensing proceedings. In some instances, the LPDR libraries maintain document collections for more than one licensed facility.

The library staff members listed are the persons most familiar with the LPDR collections. Reference librarians in the NRC Headquarters Public Document Room (PDR) are also available to assist the public in locating NRC documents. The toll-free telephone number for the PDR is 800-397-4209.

The LPDRs are listed in alphabetical order by state, then by city. The library hours given are the regularly scheduled hours. Summer or holiday hours may vary. Reference staff may not be on duty all hours that the library is open. Contact the library for further information on hours.

Regional federal depository libraries are indicated by the words "REGIONAL DEPOSITORY" following the name of the library. Selective federal depository libraries are indicated by the word "DEPOSITORY" following the name of the library. Depository libraries may have additional NRC publications in their government document collections.

The LPDRs established for nuclear power reactors have a microfiche file containing all NRC publicly-available documents issued since January 1981. These LPDRs are identified by a "*" following the name of the facility. The two high-level radioactive waste geologic repository LPDRs in Nevada also have this same microfiche file.

A number of LPDRs have on-line access to the NRC Nuclear Documents System: Advanced Design (NUDOCS/AD) or to the NRC Public Document Room Bibliographic Retrieval System (BRS). Contact the staff at the nearest LPDR to determine if the library has this access.

An index to the LPDRs, arranged alphabetically by plant name, follows the directory. Directory information is current as of April 1, 1998. Questions or comments on the LPDR Directory may be directed to Teresa Linton, Editor, at 800-397-4209.
