Hanford Tank Farm Contractor Self-Assessment Program

**DNFSB General Briefing
December 4, 2003**

**Edward S. Aromi, Jr.
President and General Manager
CH2M HILL Hanford Group, Inc.**

Office of River Protection

CH2MHILL
Hanford Group, Inc.

Tank Farm Contractor Scope of Work

- Waste management on 177 tanks**
- Manage 222-S Laboratory and 242-A Evaporator**
- Stabilize and remove waste from 149 older single-shell tanks**
- Close single-shell tanks**
- Stage waste and manage 28 newer double-shell tanks**
- Manage projects to prepare for transfer of waste to Waste Treatment Plant (WTP)**
- Search out technologies to reduce load on WTP**
- Close double-shell tanks**

Progress in Managing Tank Farms

Parameters Showing Progress			
Parameter	Units	June 2002	September 2003
ConOps	Events/200K hours worked	8.9	2.5
TSR violations	12-month rolling average	1.5	.33
Delinquent PER actions	Percent of total	48%	5%
ORPS reportable events	Reports/Month	10.2	4.8
PER/ESTARS CA backlog	Numerical reduction	5,310	1,098
Work package errors	Per package	11.13	1.18
Event-free Clock	Days between resets	6	11.1
NTS reports	Open corrective actions	60	11

LEGEND:

CA - Corrective Action
 ConOps - Conduct of Operations
 ESTARS™ - Commitment Tracking System
 NTS - Noncompliance Tracking System (Price-Anderson Amendments Act Reporting)
 ORPS - Occurrence Reporting and Processing System
 PER - Problem Evaluation Request
 TSR - Technical Safety Requirement

Structure of Self-assessment Program

- ┐ Independent Assessment**
- ┐ Management Assessment**
- ┐ Senior Safety Review Board Assessment**
- ┐ Management Observation Program Assessments**
- ┐ Specialty Assessments**
- ┐ Operational Readiness Reviews/Readiness Assessments**
- ┐ Surveillances**

Assessment Element and Interface Diagram

• - Includes QA Program Assessments - - - - - Input Advise _____ Direction

Independent Assessment

- Four to six “vertical slices” of major product lines/services per year, not counting unscheduled Independent Assessments
- Performed in accordance with procedures and Criteria and Review Approach Documents (CRADs)
- Performance and effectiveness-based with a compliance aspect
- Subcontractors assessed as part of Independent Assessment
- Led by qualified Lead Auditors with NQA-1 Certification
- Results presented in exit meeting, and to senior staff
- FY 2003 Independent Assessments resulted in 63 Problem Evaluation Requests (PERs)

Management Assessment

- ❑ Scheduled by Senior Management in each organization segment, and strict compliance to schedule is maintained
- ❑ Performed in accordance with procedures to assessment plans
- ❑ Forward-looking, and strategic in nature
- ❑ Performance- and effective-based, less emphasis on compliance
- ❑ Results rolled up into Organization MA Summary Report, addressed to the President and General Manager
- ❑ Twenty-seven FY 2003 Management Assessments resulted in 77 Problem Evaluation Requests
- ❑ Two were significant PERs, but not NTS reportable

Senior Safety Review Board Assessments

- Senior Safety Review Board consists of senior consultants with significant prior experience at executive levels of management**
- Acts on behalf of the CH2M HILL Office of the President**
- Focused review in areas of concern, emerging situations, or where special management attention or review is required**
- Provide an independent assessment capability including the capability to assess the Assessment Program's effectiveness**
- Results generally presented in a white paper format to senior management, and PERs are generated as appropriate**

Management Observation Program

- ▣ Management Observation Program Assessments (MOPs) are scheduled by managers**
- ▣ Performed in accordance with one of five standard checklists**
- ▣ Used in Projects, ESH&Q, Waste Feed Operations, and Closure Project Operations**
- ▣ 1108 MOPs in FY 2003 resulted in 460 Problem Evaluation Requests**
- ▣ In FY 2004, CH2M HILL is integrating a portion of the MOPs with Management Assessment data collection**

Specialty Assessments

- ▣ Form of management assessment not part of the Management Assessment roll-up process
- ▣ Driven by Orders and needs other than DOE O 414.1A, “Quality Assurance,” and performed to specific procedures
 - Radiological control triennial assessments
 - Maintenance Order assessments
 - Triennial fire protection assessments
 - Biennial Safety Management Program assessments
 - Other priority driven assessments
- ▣ Heavily compliance-oriented, but evaluate performance and effectiveness
- ▣ 51 Specialty Assessments in FY 2003 resulted in 147 PERs

Oversight of Contractors

- For off-site, Important-to-Safety items and services**
 - Evaluated Suppliers List
 - Inspection by Fluor Hanford, CH2M HILL Project Delivery, or Quality Assurance as appropriate
 - Receipt Inspection through a Quality Assurance Inspection Plan or Commercial Grade Item evaluation
- For on-site, Important-to-Safety services**
 - Evaluated Suppliers List
 - Implement a Subcontractor Oversight Plan
 - Perform Management Observation Program assessments
 - Implement QA independent oversight through Quality Surveillance Reports

Corrective Action Management

- In FY 2003, CH2M HILL performed 1190 forms of assessment, not including surveillances or Operational Readiness Review activity, that resulted in 747 Problem Evaluation Requests
- Corrective Action Management process follows INPO Guidance
 - Broad range of problems sought on a zero-threshold basis
 - Prompt screening
 - Graded approach to evaluation based on significance
 - Trending of problems with lower level of significance
 - Structured root cause analysis for significant problems for root, and contributing causes; extent of condition; corrective action to prevent recurrence

Corrective Action Management (cont.)

- Problem Evaluation Requests are screened, evaluated, tracked, and trended
- Graded in seven possible categories
- Significant PERs, many of which are NTS reportable, require:
 - Root Cause Analysis
 - Extent of Condition, Root, and Contributing Causal Analysis
 - Corrective Action Plan (CAP) development
 - End Point Assessment planning and execution
- Significant PERs also require CAP approval by Corrective Action Review Board consisting of senior managers

Definition	Analysis / Action	Comments
This chart shows the Electronic Suspense Tracking and Routing System (ESTARS) actions that are associated with Problem Evaluation Requests (PERs). The actions are routed and tracked in ESTARS.	<p>Analysis: The September reduction in force had a negative impact on the company delinquency rate as organizations worked through resource and priority issues.</p> <p>Action: The goal continues to be 0%. Contacts with Responsible Managers who own delinquent actions will continue.</p>	<p>PI Owner: SJ Eberlein / RL Higgins</p> <p>PI Type: Lagging</p> <p>Data Owner: MJ Sorrells</p> <p>Data Source: ESTARS / PER</p> <p>DOE-ORP Owner: DC Bryson</p>
<p>Goal:</p> <p>The goal is to maintain the total number of open ESTARS tasks associated with PERs at 0% delinquent. An interim goal of < 10% delinquent by 12/31/02 was established and met. A second interim goal of < 5% delinquent by 3/31/03 was also met.</p> <p>Blue: 0%; Green: 1 - 5%; Yellow: 6 - 10%; Red: > 10%.</p>

Summary

- CH2M HILL has an effective Assessment Program in place
- The Assessment Program is multi-faceted, and is identifying numerous opportunities for improvement
- The Program has been subject to assessment internally, by the customer, and by the Office of Enforcement Price-Anderson, and found to be acceptable
- CH2M HILL strives to improve the Assessment Program, and welcomes the opportunity to discuss further with DNFSB those opportunities

GH2M HILL
Hanford Group, Inc.

Hanford Tank Farm Contractor Self-Assessment Program

BACKUP SLIDES

Chemical Vapors Solution Progress

■ Old Paradigm

- Technical problem based on not exceeding NIOSH and ACGIH thresholds

■ New Paradigm

- Minimize employee chemical exposure through optimized ALARA principles
- Maximize employee involvement and knowledge
- Strengthen documented technical basis of Industrial Hygiene Program

Chemical Vapors Solution Progress (cont.)

■ Completed actions

- Root cause analysis
- Enhanced respiratory protection
- Conservative sampling and monitoring

■ In-process actions

- Rigorous disposition and closure of all inputs
- Enhanced Engineering Controls
- Enhanced Chemical Hazard Training
- Strong worker involvement
- Enhanced medical support and surveillance
- Enhanced Industrial Hygiene Program

Chemical Vapors Solution Progress (cont.)

Independent Assessment of Industrial Hygiene – Vapor Monitoring Program

Results:

- Health and Safety Plan does not meet requirements of the DOE for development of a comprehensive personnel monitoring strategy
- Objective evidence is lacking that personnel sampling and monitoring records were generated for inclusion in personnel medical records
- Hazard communication to the workforce needs improvement
