1.0 PURPOSE

This document lists safety class (SC) and safety significant (SS) components for the Heating Ventilation Air Conditioning (HVAC) and specifies the critical characteristics for Commercial Grade Items (CGI), as required by HNF-PRO-268 and HNF-PRO-1819. These are the minimum specifications that the equipment must meet in order to properly perform its safety function. There may be several manufacturers or models that meet the critical characteristics for any one item.

2.0 BACKGROUND

The Plutonium Finishing Plant (PFP) HVAC System includes sub-systems 25A through 25K. Specific system boundaries and justifications are contained in HNF-SD-CP-SDD-005, “Definition and Means of Maintaining the Ventilation System Confinement Portion of the PFP Safety Envelope.” The procurement requirements associated with the system necessitates procurement of some system equipment as Commercial Grade Items in accordance with HNF-PRO-268, “Control of Purchased Items and Services.”

3.0 SCOPE

The following list contains all engineering and maintenance documentation associated with each component including critical characteristics that describes the minimum specifications for standard industry equipment. The critical characteristics are verified through a combination of receipt inspections and installation testing.

The critical characteristic list assumes the new part is either the same manufacturer or part number or a replacement part specified by the vendor. Further information for the listed equipment is available from the appropriate Vendor Information (VI) files.

4.0 CRITICAL CHARACTERISTIC LISTING

Fabrication Materials:

In the interest of providing a concise document, materials used to fabricate assemblies specified in this list shall be designated as safety significant (SS) and shall be commercial grade items for in-house dedication meeting critical characteristics as follows:

a. All stainless steel/carbon steel flat stock shall be ASTM designated, as evidenced by markings or documentation, and of specified thickness/gauge within standard manufacturer’s tolerances.

b. All stainless steel/carbon steel bar stock shall be ASTM designated, as evidenced by markings or documentation, and of specified cross sectional dimension within standard manufacturer’s tolerances.

c. All gasket material shall be type and spec designated, as evidenced by markings or documentation, shall meet the specified thickness within standard manufacturer’s tolerances, and shall meet the durometer hardness as specified.
d. All stainless steel/carbon steel fasteners (i.e. bolts, nuts, washers, etc.) shall be ASTM or ASME (if so designated), size and thread specified. QA clause B73, “Control of Graded Fasteners,” shall be imposed for procurements of high strength graded fasteners (i.e. Grade 5, 8, and ASTM 325 fasteners). Clause B73 does not apply to SAE Grades 1, 2, or 4.

e. All gasket material shall be ASTM designated, as evidenced by markings or documentation, and of thickness and durometer hardness test requirements specified.

**HEPA filter Certification:**

All High Efficiency Particle Arrestor (HEPA) filters procured for PFP must meet Hanford’s quality procurement clauses B01 and B04 (or the supplier shall be currently on the FA Evaluated Suppliers’ List, already evaluated to B01 and B04) to ensure suppliers’ quality programs have been evaluated and are current. Vendors must provide documentation certifying the efficiency test of each filter shipped. This step is verified via quality procurement clause B52, “Inspection and Test Documentation”.

**Critical Components:**
(critical characteristics must be confirmed either via markings or documentation, or by measurement)

1. **Motor, Electric**
   For RF-1 and RF-2, Building 2736ZB
   
   Critical Characteristics:
   - HP = 15
   - Full load AMP = 19.4 ± 2
   - Voltage = 460 ± 20
   - Phase = 3
   - RPM = 1725 (4 pole)
   - NEMA code = G
   - Frequency = 60 Hz
   - Frame = 254T
   - Duty = Continuous
   - Enclosure = Drip Proof
   - Insulation = B

2. **Belt**
   For Bldg. 232 Exhaust Fans 1 & 2
   Critical Characteristics:
   - Size = B47
   - Outside Circumference = 50 inches [± 1/8”]
   - Pitch Length (inner circumference of belt) = 48.8” [± 1/8”]
3. Transmitter
For differential pressure transmitter PX-2, Building 2736ZB

Critical Characteristics:
- Part # DPT 2200-0.5”-3
- Manufacturer = Brandt Instruments, Inc.
- Range 0.00 to 0.50” w.g.
- Output = 3-15 psig, linear with DP
- Continuous purge through high & low legs
- Inst. Air requirement = 20 psig
- Process connections = ¼ NPTF
- Accuracy = ± 0.5%

4. Bearing

Critical Characteristics:
- Model # = Dodge #043972
- Configuration = Split Spherical Pillow Block Assembly
- Bearing Dimensions:
  - Bore = 4 ¾/16” [+.000/-0.004]
  - Outer Diameter = 9.055 [± 0.001]"
  - Width of Inner Ring = 4.094 [± 0.001]"
  - Width of Outer Ring = 2.519 [± 0.001]"
  - D1 = 5.984 [± 0.001]”  R = 0.12"

5. Belt
For Exhaust Fans 1 & 2, Bldg. 2736-ZB

Critical Characteristics:
- Size = B60
- Outside Circumference = 63 inches [± 1/8”]
- Pitch Length (inner circumference of belt) = 61.8” [± 1/8”]
6. Belt
For Exhaust Fans EF-21-241-Z, Bldg. 241

Critical Characteristics:
- Size = B46
- Outside Circumference = 49 inches [± 1/8""]
- Pitch Length (inner circumference of belt) = 47.8" [± 1/8""]

7. Belt
For Exhaust Fans EF-1-1 & EF-1-2, Bldg. 2736-ZA

Critical Characteristics:
- Size = B64
- Outside Circumference = 67 inches [± 1/8""]
- Pitch Length (inner circumference of belt) = 65.8" [± 1/8""]

8. Belt
For Exhaust Fan EF-22-25D, Bldg. 241-Z

Critical Characteristics:
- Size = 3V-800
- Outside Circumference = 80 inches [± 1/8""]
  (no pitch length available for this belt)
9. Transmitter
For differential pressure transmitter DPT-2 Building 232-Z

Critical Characteristics:
- Model # 264
- Manufacturer = SETRA
- Range 0.00 to 1.0” w.g.
- Output = 0-5 VDC
- Process connections = Barbed brass pressure fitting for ¼ push on tubing
- Accuracy = ± 1.0% Full Scale
- Repeatability <0.3% Full Scale

10. Bearing
(Ball Pillow Block Assembly)
For Exhaust Fans 1 & 2
and Return Fans 1 & 2 in 2736-ZB

Critical Characteristics:
- Model # MPD-31
- Manufacturer = SealMaster
- Bore = 1 15/16”
- Dimensions to match diagram:

11. Damper Connecting Link
For “DM-E-1-25A” actuator in duct level 234-5Z

Critical Characteristics:
- Ball Joint Rod End
  - McMaster-Carr #99 catalog #6072K34 ½-20 Female THD w/ Stud
  - McMaster-Carr #99 catalog #6072K14 ½-20 Male THD w/ Stud
