Technical Progress Report

Quarterly Report

Alkaline-Surfactant-Polymer Flooding
And Reservoir Characterization of the
Bridgeport and Cypress Reservoirs
Of the Lawrence Field

Report Period Start Date:  July 01, 2002
Report Period End Date:  September 30, 2002

Principal Authors
Malcolm Pitts (Surtek Inc.), Ron Damm (Plains Illinois Inc.)
Bev Seyler (Illinois State Geological Survey)

Date Report Issued:  March 2003

DOE Award Number:  DE-FC26-00BC15126

Name and Address of Submitting Organization:
Plains Illinois Inc.
PO Box 318
Bridgeport, Illinois 62417

Surtek Inc
1511 Washington Ave
Golden, Colorado 80401

Abstract

Feasibility of alkaline-surfactant-polymer flood for the Lawrence Field in Lawrence County, Illinois is being studied. Two injected formulations are being designed; one for the Bridgeport A and Bridgeport B reservoirs and one for Cypress and Paint Creek reservoirs. Fluid-fluid and coreflood evaluations have developed a chemical solution that produces incremental oil in the laboratory from the Cypress and Paint Creek reservoirs. A chemical formulation for the Bridgeport A and Bridgeport B reservoirs is being developed.

A reservoir characterization study is being done on the Bridgeport A, B, & D sandstones, and on the Cypress sandstone. The study covers the pilot flood area and the Lawrence Field.

Executive Summary
No progress was made during this report period. Various options of how to continue the project are being reviewed internally.

Experimental
No progress was made during this report period. Various options of how to continue the project are being reviewed internally.

Results and Discussion
No progress was made during this report period. Various options of how to continue the project are being reviewed internally.

Conclusion
No progress was made during this report period. Various options of how to continue the project are being reviewed internally.
