Quarterly Technical Progress Report

Report Period Start Date: July 1, 2003
Report Period End Date: September 30, 2003

Joel W. Muehlhauser,
Administrator

October 20, 2003

DOE Contract No. DE-AC22-95PC95231

The University of Tennessee
Space Institute
Energy Conversion Research and Development Programs
411 B. H. Goethert Parkway
Tullahoma, TN 37388

DISCLAIMER

This report was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government, nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or any agency thereof.

ABSTRACT

The Discharge Monitoring Reports (DMRs) for July, August and September, 2003, were prepared and submitted to the Tennessee Department of Environment and Conservation (TDEC).

Discussions were held during July with our environmental consulting firm (TVG Environmental) and the Tennessee Department of Environment and Conservation (TDEC) about the groundwater testing program for the CFFF. Both TVG and TDEC advised that we continue with the semi-annual sampling schedule for at least the next 6 months to a year. A relatively new category titled Site-Specific Impaired Classification is being considered for the CFFF, but the documentation requirements are expected to be extensive and expensive. The next sampling event will be contracted for in November 2003.

In addition to regular monthly report to TDEC, a regional inspector from TDEC came by to inspect the CFFF for compliance with the water discharge permit. He took a short tour of the facility and subsequently issued a statement that the CFFF was in compliance with the permit.

TVG Environmental, Inc. of Nashville was requested to provide a cost quote to perform the next scheduled groundwater sampling event for the CFFF. They quoted the same per-event cost as the two previous sampling events. TVG was awarded the contract and the next scheduled semi-annual sampling event will occur in mid-November.

INTRODUCTION

Maintenance work on the DOE CFFF facility and other related government property is no longer authorized under this contract in accordance with the DOE-UT Settlement Agreement. Environmental remediation preservation of the facility is going on. Government property has been transferred to UTSI as owner, which frees up many items for proper disposal. Actions are underway to dispose of other wastes, and control pests and water at the DOE CFFF.

EXECUTIVE SUMMARY

The Discharge Monitoring Reports (DMRs) July, August and September, 2003, were prepared and submitted to the Tennessee Department of Environment and Conservation (TDEC).

Discussions were held during July with our environmental consulting firm (TVG Environmental) and the Tennessee Department of Environment and Conservation (TDEC) about the groundwater testing program for the CFFF. Both TVG and TDEC advised that we continue with the semi-annual sampling schedule for at least the next 6 months to a year. A relatively new category titled Site-Specific Impaired Classification is being considered for the CFFF, but the documentation requirements are expected to be extensive and expensive. The next sampling event will be contracted for in November 2003.

In addition to regular monthly report to TDEC, a regional inspector from TDEC came by to inspect the CFFF for compliance with the water discharge permit. He took a short tour of the facility and subsequently issued a statement that the CFFF was in compliance with the permit.

TVG Environmental, Inc. of Nashville was requested to provide a cost quote to perform the next scheduled groundwater sampling event for the CFFF. They quoted the same per-event cost as the two previous sampling events. TVG was awarded the contract and the next scheduled semi-annual sampling event will occur in mid-November.

EXPERIMENTAL

Not applicable for the work performed.

RESULTS AND DISCUSSIONS:

The progress in each task is as follows:

TASK 1 – FACILITY MAINTENANCE AND PROPERTY MANAGEMENT

In September 1998, a stop-work order was issued for work activity in the DOE Facility maintenance area. Work to administer government-owned property continued.

On September 22, 1999, Department of Energy and the University of Tennessee signed a SETTLEMENT AGREEMENT resolving all claims and property accountable under Tasks 1-5.

TASK 2 - REPORTING AND ARCHIVING

July, August and September 2003 Monthly Technical Progress reports have been submitted.

High Risk Personal Property Inventory for period ending September 30, 2003 was submitted on October 8, 2003.

The Quarterly Key Staffing Report for the period April 1 2003 – June 30, 2003, was submitted on July 28, 2003.

Quarterly Technical Progress Report for the period April 1, 2003 – June 30, 2003, was submitted on August 1, 2003.

Quarterly Technical Progress Report for the period January 1, 2003 – March 31, 2003, was corrected and re-submitted on August 1, 2003.

TASK 3 - SITE ENVIRONMENTAL COMPLIANCE AND REMEDIATION

UTSI shall continue implementation and compliance with the State of Tennessee approved plan for groundwater remediation. UTSI shall remove from the site, and properly dispose of, all industrial type non-hazardous wastes. In addition, UTSI shall properly remove all asbestos-containing cooling water tower materials and dispose of these materials properly. In addition, UTSI shall continue the monitoring and treatment of holding pond effluent per the site Water Discharge Permit with the State of Tennessee.

The Discharge Monitoring Reports (DMRs) for July, August and September, 2003, were prepared and submitted to the Tennessee Department of Environment and Conservation (TDEC).

Discussions were held during July with our environmental consulting firm (TVG Environmental) and the Tennessee Department of Environment and Conservation (TDEC) about the groundwater testing program for the CFFF. Both TVG and TDEC advised that we continue with the semi-annual sampling schedule for at least the next 6 months to a year. A relatively new category titled Site-Specific Impaired Classification is being considered for the CFFF, but the documentation requirements are expected to be extensive and expensive. The next sampling event will be contracted for in November 2003.

In addition to regular monthly report to TDEC, a regional inspector from TDEC came by to inspect the CFFF for compliance with the water discharge permit. He took a short tour of the facility and subsequently issued a statement that the CFFF was in compliance with the permit.

TVG Environmental, Inc. of Nashville was requested to provide a cost quote to perform the next scheduled groundwater sampling event for the CFFF. They quoted the same per-event cost as the two previous sampling events. TVG was awarded the contract and the next scheduled semi-annual sampling event will occur in mid-November.

TASK 4 - SITE REACTIVATION

No work was scheduled or performed

TASK 5 - DISASSEMBLY AND DISMANTLEMENT (D&D) OF THE CFFF

No work was scheduled or performed

TASK 6 – ADVANCED TECHNOLOGY, RESEARCH, DEVELOPMENT AND ENGINEERING FOR OTHER FEDERAL OR DOE PROGRAMS

Subtask 6.02 Evaluation of Methods for Application of Epitaxial Buffer and Superconductor Layers

No Activity.

Subtask 6.03 Coated Conductor Development and Program Management

Discontinued effective September 30, 1999.

Subtask 6.04 Optimum Coated Conductor

No Activity.

Subtask 6.05 Cost Performance Analysis of Potential Manufacturing Processes

Discontinued effective August 31, 1999.

Subtask 6.06 Development of Real Time process Control using In-Situ Diagnostics

Discontinued effective September 30, 1999.

OPEN ITEMS

January 2000 – September 2003 Monthly Technical Progress Reports

October 1999 –June 30, 2003 Quarterly Technical Progress Report

Kevin Trembath's Thesis Topical Report, "Statistically Designed Experimental Study of Sol-Gel Based Film Coating Scheme for High Temperature Superconductors and Buffer Materials and Related Manufacturing Process Cost Evaluation" submitted August 31, 2000.

QUARTERLY VARIANCE REPORT

JULY 1, 2003, THROUGH SEPTEMBER 30, 2003, QUARTERLY VARIANCE REPORT

Planned vs. Actual Expenditures

(thousands of dollars)

TASK	PLANNED	ACTUALS	VARIANCE
1	0.0	0.0	0.0
2	0.0	0.0	0.0

Planned vs. Authorized Funding

Cumulative

Task	PLANNED	AUTHORIZED FUNDING
1	1495.2	1495.2
2	574.0	574
3	561.0	561
4	0.0	0
5	0.0	0
SUBTOTAL	2630.2	2630.2
6	3820.9	3820.9
TOTAL	6451.1	6451.1

CONCLUSIONS:

Environmental restoration activities at the CFFF will continue and funding to cover these activities will be continued in accordance with the SETTLEMENT AGREEMENT.

Contract reporting requirements are being met on time. Future contract reporting requirements need to be reviewed and modified in accordance with the SETTLEMENT AGREEMENT.
