ABSTRACT

A graphical compilation is presented of atomic and molecular cross sections of interest to controlled thermonuclear research. The present compilation is a revision of ORNL-3113, published in 1960. The cross sections are shown, as a function of energy, for collision processes involving molecular ion dissociation, charge exchange, excitation, ionization, photoionization, scattering, energy loss, secondary products, and recombination. Pertinent nuclear cross sections are also included. A bibliography is given covering the literature since 1950.

INTRODUCTION

This report is a revision of a previous compilation of atomic and molecular cross sections available in the literature since 1950. The work was undertaken as a guide for investigators in the thermonuclear field at Oak Ridge National Laboratory. The comprehensive surveys of Massey and Burhop¹ and Allison and Warshaw² summarize the data prior to 1950. This compilation is principally limited to atomic and molecular collision processes that may be encountered in the attempts to develop a high density, high temperature plasma. In addition to presenting the cross sections in graphical form, we have compiled a bibliography in each section.

In the original papers, the cross sections are stated in a variety of units (πa_0^2 , collision probability, etc.). Previously the compilation reduced the cross sections to $\text{cm}^2/\text{gas atom}$, however, experiments in the past three years have indicated that in the low energy region a diatomic molecule cannot be regarded as two separate atoms. Consequently, all cross sections are now reduced to $\text{cm}^2/\text{molecule}$. In addition, the cross sections are plotted as a function of both particle velocity and particle.

The notation used is that in current use. The cross section σ_{if} represents the cross section of an energetic particle of initial charge state i and final charge state f .

In many measurements (notable in charge exchange) the data of many investigators are consistent within a few per cent; however, for convenience and to avoid duplication, only a representative sample is reproduced.

LIST OF REPORTS REFERRED TO IN THE BIBLIOGRAPHY

<u>REPORT SYMBOL</u>	<u>ISSUING INSTALLATION</u>
AASU	Navy (Anti-Aircraft Study)
AEC	Atomic Energy Commission
AECU	Atomic Energy Commission
AERE Inf/Bib	Atomic Energy Research Establishment, Harwell (Informal Bibliography)
AERE Lib/Trans	Atomic Energy Research Establishment, Harwell (Library Translation)
AERE-TR	Atomic Energy Research Establishment, Harwell
AFCRC-TN	Air Force Cambridge Research Center
AFCRC-TR	Air Force Cambridge Research Center
AFCRL	Air Force Cambridge Research Laboratory
AFOSR	Air Force Office of Scientific Research
AFSWC-TR	Air Force Special Weapons Center
ANL	Argonne National Laboratory, Illinois
ARL-TN	Air Material Command, Aircraft Radiation Laboratory, Wright-Patterson AFB, Ohio AVCO Manufacturing Corp., Avco Research Laboratory, Everett, Massachusetts Ramo-Wooldridge Corp., Aeronautical Research Labora- tory, Los Angeles, California Thompson Products, Inc., Antenna Research Laboratory, Columbus, Ohio Wright Air Development Center, Aeronautical Research Laboratory, Wright-Patterson AFB, Ohio
AROD	Office of the Chief of Research and Development, Army Research Office, Washington, D.C.
ASTIA-AD	Armed Services Technical Information Agency
BNL	Brookhaven National Laboratory
CFA	Commissariat a l'Energie Atomique, Paris
CWR	Curtiss-Wright Corporation
CX	New York University

FTD-TT	Russian Translations
GA	General Atomics
GACD	General Atomic Division of General Dynamics Corp., California
GCA-TR	Geophysics Corporation of America Bedford, Massachusetts
GM-AD	General Atomics Division of General Dynamics Corp., California
HE	Fluid Mechanics Laboratory or Institute of Engineer- ing Research, Berkeley, California
IA	Franklin Institute of Laboratories for Research and Development, Philadelphia
ISC	Iowa State College
JINR-P	Joint Institute for Nuclear Research, Dubna, USSR, Laboratory of Theoretical Physics
LA	Los Alamos Scientific Laboratory
LMSD	Lockheed Aircraft Corporation
MIT-TR	Massachusetts Institute of Technology
NASA-TN-D	National Aeronautics and Space Administration, Goddard Space Flight Center, Greenbelt, Maryland
NASA-TR-R	National Aeronautics and Space Administration, Goddard Space Flight Center, Greenbelt, Maryland
NBS	National Bureau of Standards
NBS-C	National Bureau of Standards, Boulder, Colorado
NP	Technical Information Service Extension, AEC
NP-tr	Non-Project Translation
NRL	Naval Research Laboratory, Washington, D.C.

NYO	New York Operations Office, AEC
ORNL	Oak Ridge National Laboratory
ORO	Oak Ridge Operations Office, AEC
RADC-TN	Rome Air Development Center, Griffiss AFB, New York
RISO	Atomenergikommissioner, Denmark
SCTM	Sandia Corporation
SRB	Lockheed Aircraft Corporation, Missles and Space Division, Sunnyvale, California
TID	Technical Information Service Extension, AEC
UCRL	University of California Radiation Laboratory
WADC-TN	Wright Air Development Center Wright-Patterson AFB, Ohio
Wis-AEC	University of Wisconsin, Naval Research Laboratory
ZPh	General Dynamics/Convair, San Diego, California

APPENDIX B. ENERGY, VELOCITY, AND MOMENTUM TABLES
FOR ELECTRONS, PROTONS, H_2^+ , H_3^+ , AND HELIUM IONS

APPENDIX B. ENERGY, VELOCITY, AND MOMENTUM TABLES FOR ELECTRONS,
 PROTONS, H_2^+ , H_3^+ , AND HELIUM IONS

	<u>Page</u>
Table 1. Energy, Velocity, and Momentum for H^+ Ions	306
