MONTE CARLO METHODS
A BIBLIOGRAPHY COVERING THE PERIOD 1949 TO 1963

Rose Kraft
Carl J. Wensrich

April 1, 1964

This bibliography supersedes UCRL-6581.

The authors do not claim exhaustiveness for this bibliography but hope that it will meet the need for a reference source and as a basis for the eventual compilation of a more complete bibliography. Readers are invited to address their suggestions for inclusion of additional titles to the Technical Information Division, Lawrence Radiation Laboratory, Livermore, California.

The authors wish to acknowledge the assistance of Dr. Donald H. Davis, who originated the request for the compilation and who reviewed the references for relevancy.
