PREFACE

This bibliography gives a listing of Sandia Corporation papers relating to product reliability. Most of these papers have been made available to the public under the Civilian Application Program of the Atomic Energy Commission by Sandia Corporation, a prime contractor to the AEC. Many other papers, which are classified, are not listed and must be obtained through proper security channels. Requests for papers listed as SCR, SC, or SCTM should be directed to the Office of Technical Services, Department of Commerce, Washington 25, D. C. OTS prices for reproductions are included where they are known. The abbreviations ph and mf indicate photostat or microfilm. Starred items are available from OTS in printed form.

Correspondence may also be directed to the Technical Information Division, Sandia Corporation, Albuquerque, New Mexico, in regard to material which may be available.
