

After the Mandates & Manifestos, What Next? The Denton Declaration at 5

#UNTOA17 | #DentonDeclaration

Spencer D. C. Keralis

Research Associate Professor
Head, Digital Humanities &
Collaborative Programs

University of North Texas

@hauntologist

The Program

I. Background

II. Panelist Introductions

III. Structured Q&A

IV. Wrap Up

ca. 2012 CE

- January 18, 2011: NSF mandated “Data Management Plans” in new proposals.
- NIH “data sharing” mandate about 10 years old (2003).
- Proliferation of open access policies at universities - largely “toothless” (Keralis et al., 2013)
- Parallel proliferation of “statements” describing principles related to open access, digital culture, digital humanities, etc., etc., etc. ...

<https://www.digitalmanifesto.net/>

The Denton Declaration

May 22, 2012 - facilitated workshop - 17 participants

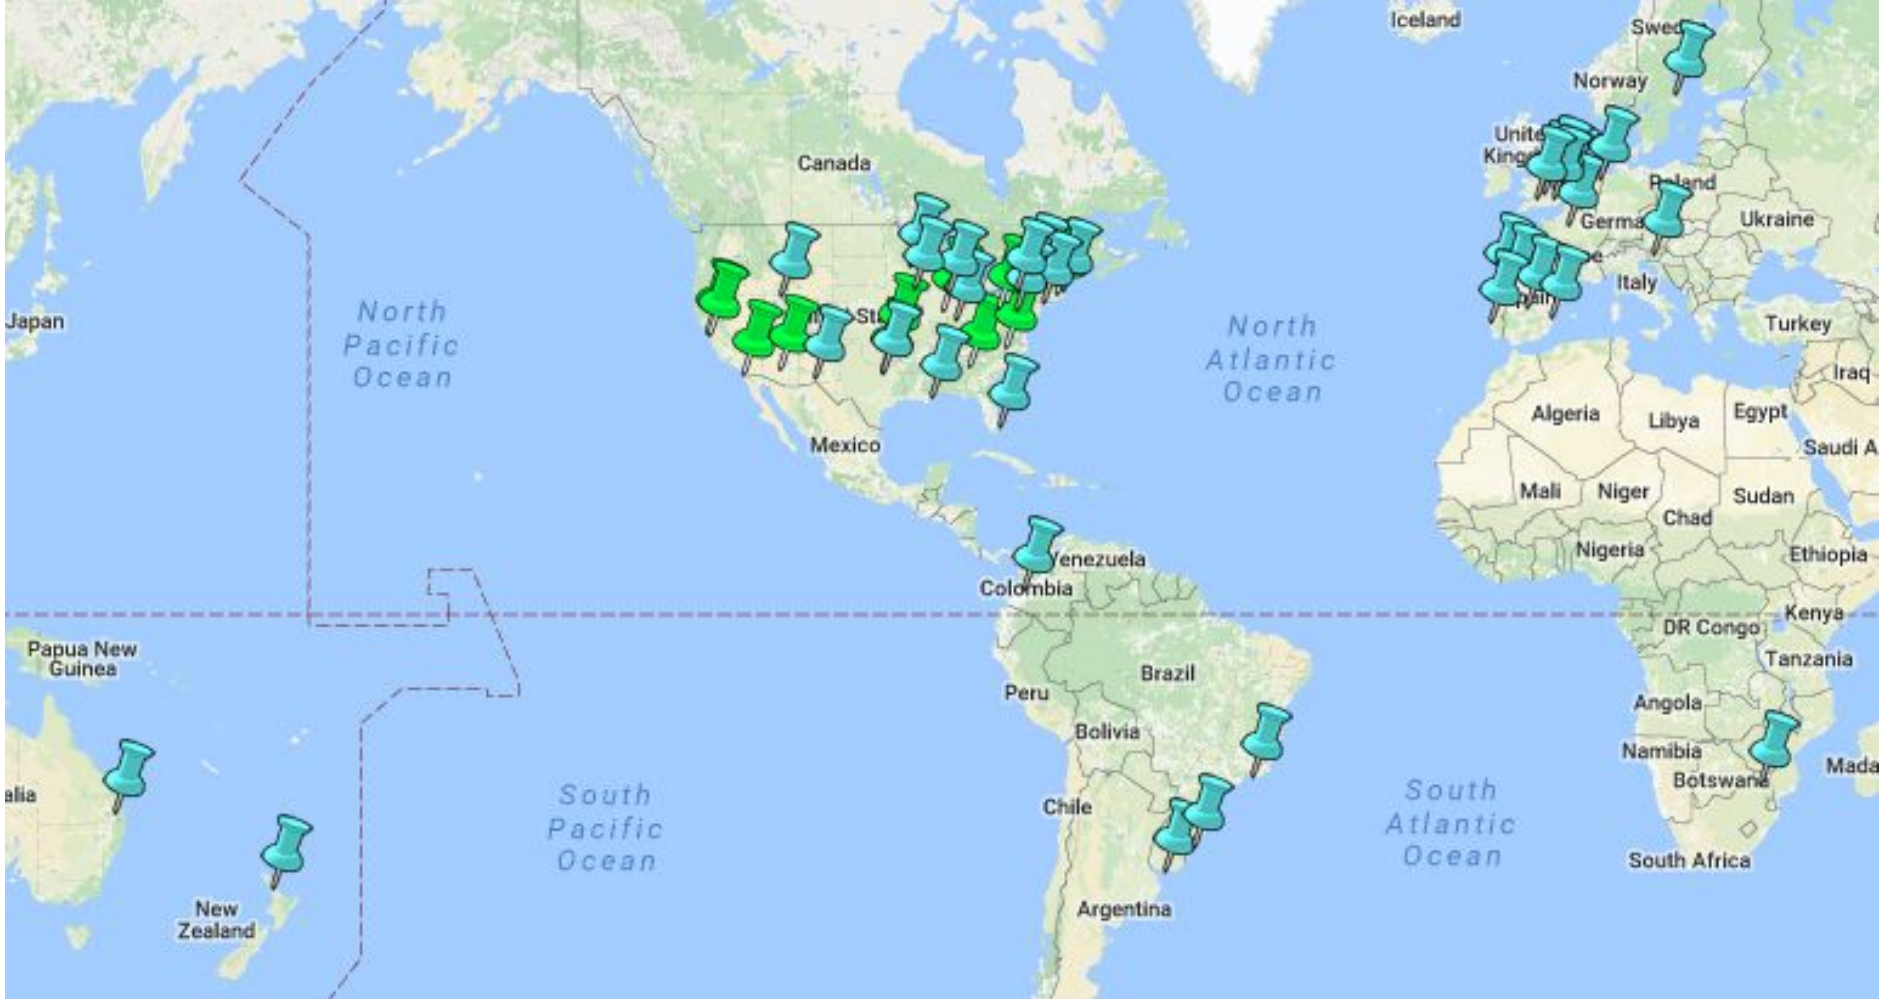

Published on <http://openaccess.unt.edu/> and in CLIR Report 160

59 cosigners from US, Europe, and South America

>20 Google Scholar citations

Declarations

- Open access to research data is critical for advancing science, scholarship, and society.
- Research data, when repurposed, has an accretive value.
- Publicly funded research should be publicly available for public good.
- Transparency in research is essential to sustain the public trust.
- The validation of research data by the peer community is an essential function of the responsible conduct of research.
- Managing research data is the responsibility of a broad community of stakeholders including researchers, funders, institutions, libraries, archivists, and the public.
